 4. According to the United States Department of Labor (MUTCD): There are three threshold considerations in planning for pedestrian safety in temporary traffic control zones on highways and streets:
 - a. Pedestrians should not be led into direct conflicts with work site vehicles, equipment, or operations.
 - b. Pedestrians should not be led into direct conflicts with mainline traffic moving through or around the work site.
 - c. Pedestrians should be provided with a safe, convenient travel path that replicates as nearly as possible the most desirable characteristics of sidewalks or footpaths.

In accommodating the needs of pedestrians at work sites, it should always be remembered that the range of pedestrians that can be expected is very wide, including

the blind, the hearing impaired, and those with walking handicaps. All pedestrians need protection from potential injury and a smooth, clearly delineated travel path.

Therefore, every effort should be made to separate pedestrian movement from both work site activity and adjacent traffic. Whenever possible, signing should be used to direct pedestrians to safe street crossings in advance of an encounter with a temporary traffic control zone. Signs should be placed at intersections so that pedestrians, particularly in high-traffic-volume urban and suburban areas, are not confronted with mid-block work sites that will induce them to skirt the temporary traffic control zone or make a mid-block crossing. It must be recognized that pedestrians will only infrequently retrace their steps to make a safe crossing. Consequently, ample advance notification of sidewalk closures is critically important.

The Contractor shall raise, level and seal brick pavers from map provided by the Village.

The tactile warning surface panel will be of brick paver material.
 1. ADA truncated dome detectable warning pavers will be used. Prior to purchasing the pavers, samples of available colors will be provided to the Village for Village selection.
 2. A paver pattern diagram is attached listing the ADA requirements for dimensions.

The Contractor shall ensure that extra pavers, sand, dust and other debris left on site will be removed. If any grass or mulch areas are destroyed this must also be put back to its original state of 4" of topsoil and seed or 4" of dark brown mulch.

Explanations

KENDALL COUNTY

The following list is considered as those days for which holiday rates of wages for work performed apply: New Years Day, Memorial Day, Fourth of July, Labor Day, Thanksgiving Day, Christmas Day and Veterans Day in some classifications/counties. Generally, any of these holidays which fall on a Sunday is celebrated on the following Monday. This then makes work performed on that Monday payable at the appropriate overtime rate for holiday pay. Common practice in a given local may alter certain days of celebration. If in doubt, please check with IDOL.

EXPLANATION OF CLASSES

ASBESTOS - GENERAL - removal of asbestos material/mold and hazardous materials from any place in a building, including mechanical systems where those mechanical systems are to be removed. This includes the removal of asbestos materials/mold and hazardous materials from ductwork or pipes in a building when the building is to be demolished at the time or at some close future date.

ASBESTOS - MECHANICAL - removal of asbestos material from mechanical systems, such as pipes, ducts, and boilers, where the mechanical systems are to remain.
