CERTIFIED MAIL

P3442940Y3

SEP 23 1997

Amoco Oil Company
Attn: Joseph Murzyn
2021 Spring Road, Suite 400
Oakbrook, Illinois 60521

Re: IPI #0938079014 - Kendall County
Oswego Amoco Oil Company #9526
Rt. 34 & 71
LUST Incident No. 931874
LUST Technical File

Dear Mr. Murzyn:

The Illinois Environmental Protection Agency ("Illinois EPA") has reviewed the Professional Engineer Certification form which has been submitted for the above-referenced LUST incident. This information was dated March 28, 1997, was received by the Agency April 1, 1997, and was prepared by Joseph Murzyn.

The Corrective Action Completion Report and the Professional Engineer Certification submitted pursuant to 35 Illinois Administrative Code Part 754 indicate that remediation has been successfully completed.

Based upon (a) the certification by Debra Hagerty, a Registered Professional Engineer of Illinois, and pursuant to Section 57-10 of the Illinois Environmental Protection Act ("Act") (415 ILCS 5/57-10), your request for a no further remediation determination is granted under the conditions and terms specified in this letter.

Issuance of this No Further Remediation Letter (Letter), based on the certification of the Registered Professional Engineer signifies that (1) all statutory and regulatory corrective action requirements applicable to the occurrence have been complied with; (2) all corrective action concerning the occurrence has been completed; and (3) no further remediation concerning the occurrence is necessary for the protection of human health, safety and the environment. Pursuant to Section 57-10(d) of the Act, the No Further Remediation Letter shall apply in favor of the following persons:

1. Amoco Oil Company.

110000000000

Page 2

- 2 The owner and operator of the US EIS.
- 3 Any parent corporation or subsidiary of the owner or operator of the US EIS.
- 4 Any co-owner or co-operator, either by joint-tenancy, right of survivorship, or any other party sharing a legal relationship with the owner or operator to whom the letter is issued.
- 5 Any holder of a beneficial interest of a land trust or inter vivos trust, whether revocable or irrevocable.
- 6 Any mortgagee or trustee of a deed of trust of the owner of the site or any assignee, beneficiary, or any successor in interest of the owner of the site.
- 7 Any successor in interest of such owner or operator.
- 8 Any transferee of such owner or operator whether the transfer was by sale, mortgagee proceeding, partition, dissolution of marriage, settlement or adjudication of any civil action, charitable gift or bequest, or
- 9 Any heir or devisee of such owner or operator.

This Letter, including all attachments, must be filed as a single instrument with the Office of the Recorder or Registrar of Titles in the County where the above-referenced site is located within 45 days of its receipt. This Letter shall not be effective until officially recorded by the Office of the Recorder or Registrar of Titles of the applicable county in accordance with Illinois law so that it forms a permanent part of the chain of title for the above-referenced property. Within 30 days of this Letter being recorded by the Office of the Recorder or Registrar of Titles of the applicable County, a certified copy of this Letter, as recorded, shall be obtained and submitted to the Illinois EPA. An acknowledgment of a registered title shall be obtained that the Leaking Underground Storage Tank Environmental Notice attached to this Letter be the first part of the instrument filed.

CONDITIONS AND LIMITED APPROVAL

LEAKING UNDERGROUND STORAGE TANK ENVIRONMENTAL NOTICE

- 1 The remediation objectives for the above-referenced site described in the Leaking Underground Storage Tank Environmental Notice of this Letter were established in accordance with the requirements of the proposed Limited Approach to Corrective Action Objectives (LACO) IS Illinois Administrative Code Part 742.1005.
- 2 The site described in the attached Leaking Underground Storage Tank Environmental Notice of this Letter shall not be used in a manner that is inconsistent with the following land use limitation. There are no land use limitations.

5 10000 01000

Page 3

- 7 The land use limitation specified in this Letter may be revised if
- Further investigation or remedial action has been conducted that documents the attainment of objectives appropriate for the new land use, and
 - A new Letter is obtained and recorded in accordance with Title XVII of the Act and regulations adopted thereunder.

PRELIMINARY REMEDIATION AND INSTITUTIONAL/INDUSTRIAL COMMERCIAL

4 Preventive None

Institutional This Letter shall be recorded as a permanent part of the chain of title for the site described in the attached Leaking Underground Storage Tank Environmental Notice.

5 Failure to manage the controls in full compliance with the terms of this Letter may result in violation of this Letter.

CERCLA/RCRA

- Any contaminated soil or groundwater that is removed, excavated, or disturbed from the above-referenced site must be handled in accordance with all applicable laws and regulations.
- Further information regarding this site can be obtained through a written request under the Freedom of Information Act (5 U.S.C. 552).

Bureau of Land #24
1021 North Grand Avenue East
Post Office Box 19276
Springfield, IL 62794-9276

8 Pursuant to Section 57 (d)(4) of the Act (415 ILCS 5/57 (d)(4)), should the Illinois EPA seek to void this Letter, the Illinois EPA shall provide notice to the current title holder and to the owner and/or operator at the last known address. The notice shall specify the cause for the voidance, explain the provisions for appeal, and describe the facts in support of the cause. Specific acts or omissions that may result in the voidance of this Letter include, but shall not be limited to:

- Any violation of institutional controls or industrial/commercial land use restrictions;

31500001007

Page 4

- b) The failure to operate and maintain preventive or engineering controls or to comply with any applicable groundwater monitoring plan.
- c) The disturbance or removal of contamination that has been left in-place in accordance with the Corrective Action Plan or Completion Report.
- d) The failure to comply with the recording requirements for the Letter.
- e) Obtaining the Letter by fraud or misrepresentation; or
- f) Subsequent discovery of contaminants, not identified as part of the investigative or remedial activities upon which the issuance of the Letter was based, that pose a threat to human health or the environment

For purposes of appeal, this constitutes the Agency's final decision regarding the above matters. Please see Appendix 1 for an owner or operator's appeal rights.

Submit the certified copy of this letter, as recorded, to:

THE ABOVE SPACE FOR RECORDER'S OFFICE

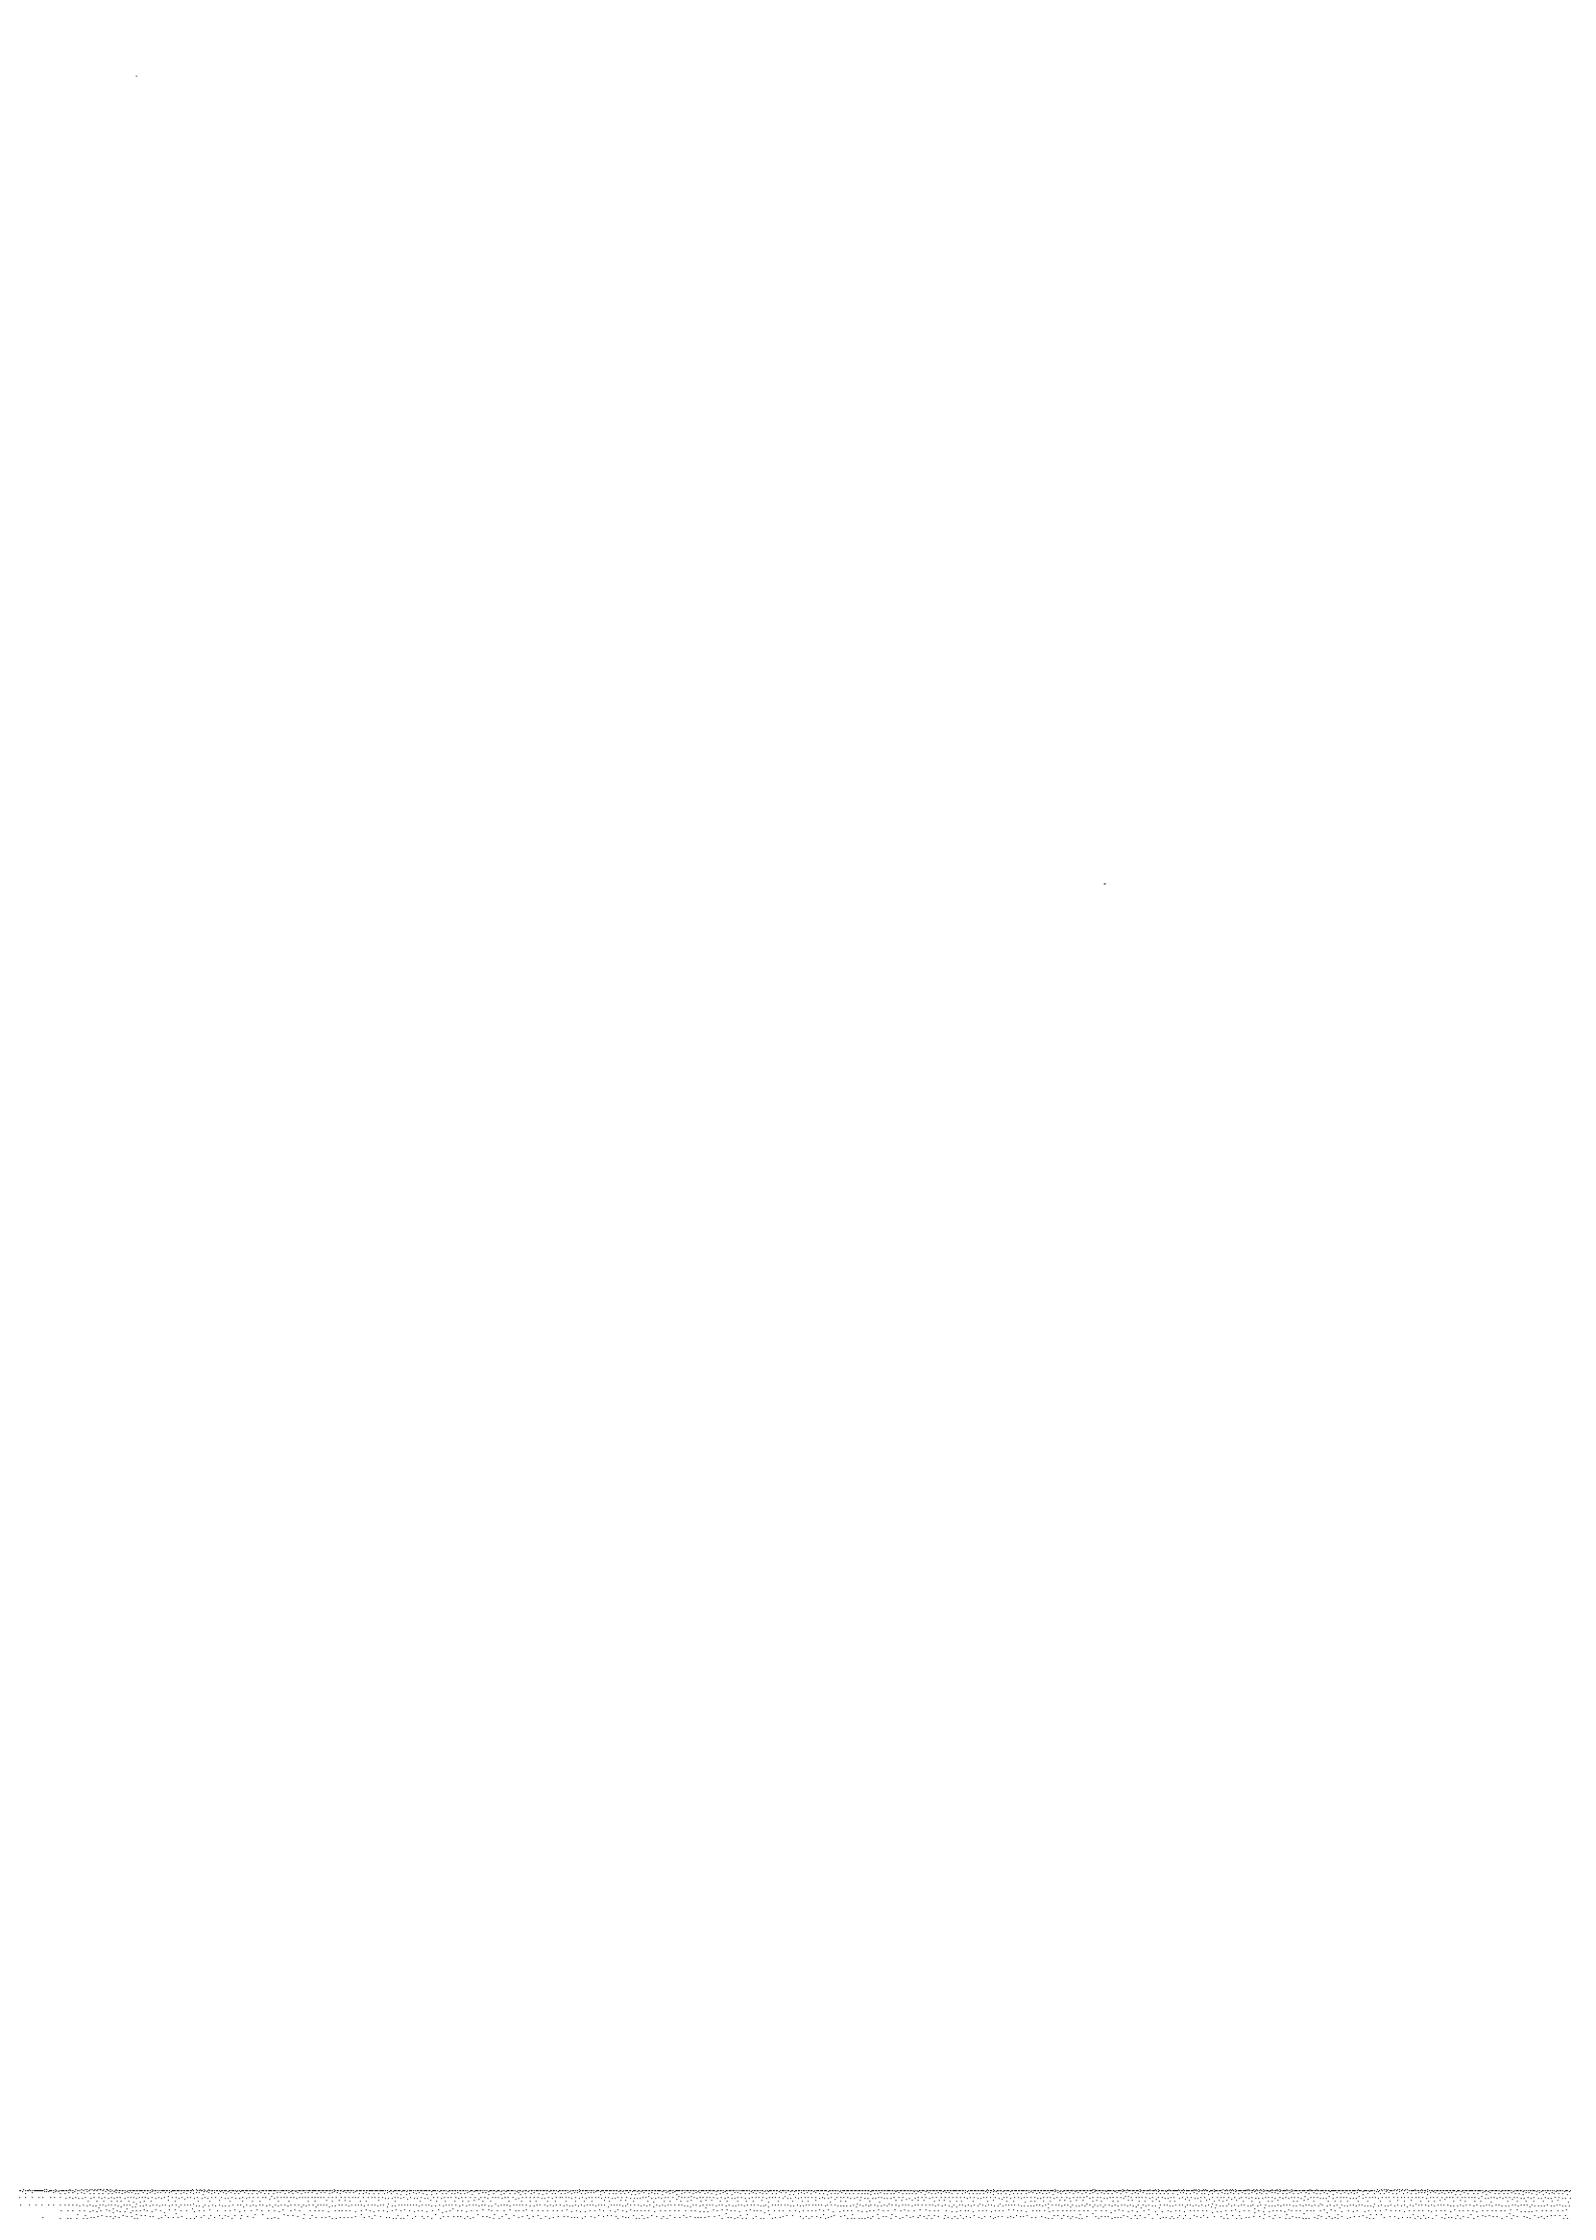

THIS ENVIRONMENTAL NO FURTHER REMEDIATION LETTER MUST BE SUBMITTED BY THE OWNER/OPERATOR WITHIN 45 DAYS OF ITS RECEIPT, TO THE RECORDER OF DEEDS OF KENDALL COUNTY IN WHICH THE SITE (AS DESCRIBED BELOW) IS LOCATED.

Illinois State EPA Number: 0938075014

LUST incident No : 931874

Amoco Oil Company, the owner and operator, whose address is 2021 Spring Road, Suite 400, Oakbrook, Illinois, has performed investigative and/or remedial activities for the site that can be identified by the following legal description:

1. Legal description or Reference to a Plat Showing the Boundaries: PARCEL ONE: That part of the East 1/4 of Section 17, Township 37 North, Range 8 East of the Third Principal Meridian, in Kendall County, Illinois, described as follows: Commencing at the intersection of the center line of Illinois Route 71 with the center line of Wolf Road, thence South 31 degrees, 35 minutes, 0 seconds West along the center line of aforesaid Route 71, a distance of 434.85 feet to its intersection with the prolongation North West and Southeasterly of the Northeasterly line of Lot 1 in Unit No. 1 of George D. Smith's Subdivision in aforesaid Section 17 for the point of beginning, then North 31 degrees, 35 minutes, 0 seconds East in aforesaid center line 148.0 feet; thence North 58 degrees, 25 minutes, 0 seconds West in a line that is the prolongation Southeasterly of the Southwestesterly face of an existing concrete block building 122.50 feet to the Southeasterly face of another concrete building; thence

31005000996

Page 2

North 31 degrees, 35 minutes, 0 seconds East in the Southeastery face of last described building and its prolongation North East 18 50 feet, thence North 58 degrees, 25 minutes, 0 seconds West 97 10 feet to the curved center line of U.S. Route 34, thence Southwesterly along said center line of U.S. Route 34, being a curved line, convex to the South East, having a radius of 1343 15 feet, whose chord of 96 13 feet bears South 66 degrees, 51 minutes, 40 seconds West, an arc distance of 96 15 feet to the Northeastery line of Lot 1 in Unit No. 1 of George D. Smith's Subdivision extended Northwesterly; thence South 40 degrees, 40 minutes, 30 seconds East along the extension of and said Northeastery line of Lot 1, a distance of 288 88 feet to the Point of Beginning, in the Township of Oswego, Kendall County, Illinois

PARCEL TWO: That part of the East 1/2 of Section 17, Township 47 North, Range 8 East of the Third Principal Meridian, in Kendall County, Illinois, described as follows: Commencing at the intersection of Illinois Route 71 with the center line of Wolf Road, thence South 31 degrees, 35 minutes, 0 seconds West along the center line of aforesaid Route 71 a distance of 286 48 feet to a point that is 148 0 feet North East of the intersection of aforesaid center line, with the prolongation Southeastery of the Northeastery line of Lot 1 in Unit No. 1 of George D. Smith's Subdivision in aforesaid Section 17, thence North 58 degrees, 25 minutes, 0 seconds West, in a line that is the prolongation Southeastery of the Southwestery face of a concrete block building, 122 50 feet to the Southeastery face of another concrete building, thence North 41 degrees, 35 minutes, 0 seconds East in the Southeastery face of last described building and its prolongation North East 18 50 feet, thence North 58 degrees, 25 minutes, 0 seconds West 97 10 feet to the curved center line of U.S. Route 34, thence Northeastery along said center line of U.S. Route 34, being a curved line, convex to the South East, having a radius of 1343 15 feet, whose chord of 112 48 feet bears North 62 degrees, 24 minutes, 40 seconds East, an arc distance of 112 52 feet to the aforesaid center line of Wolf Road, thence North 74 degrees, 58 minutes, 0 seconds East along the center line of Wolf Road 235 00 feet to the Point of Beginning, in the Township of Oswego, Kendall County, Illinois

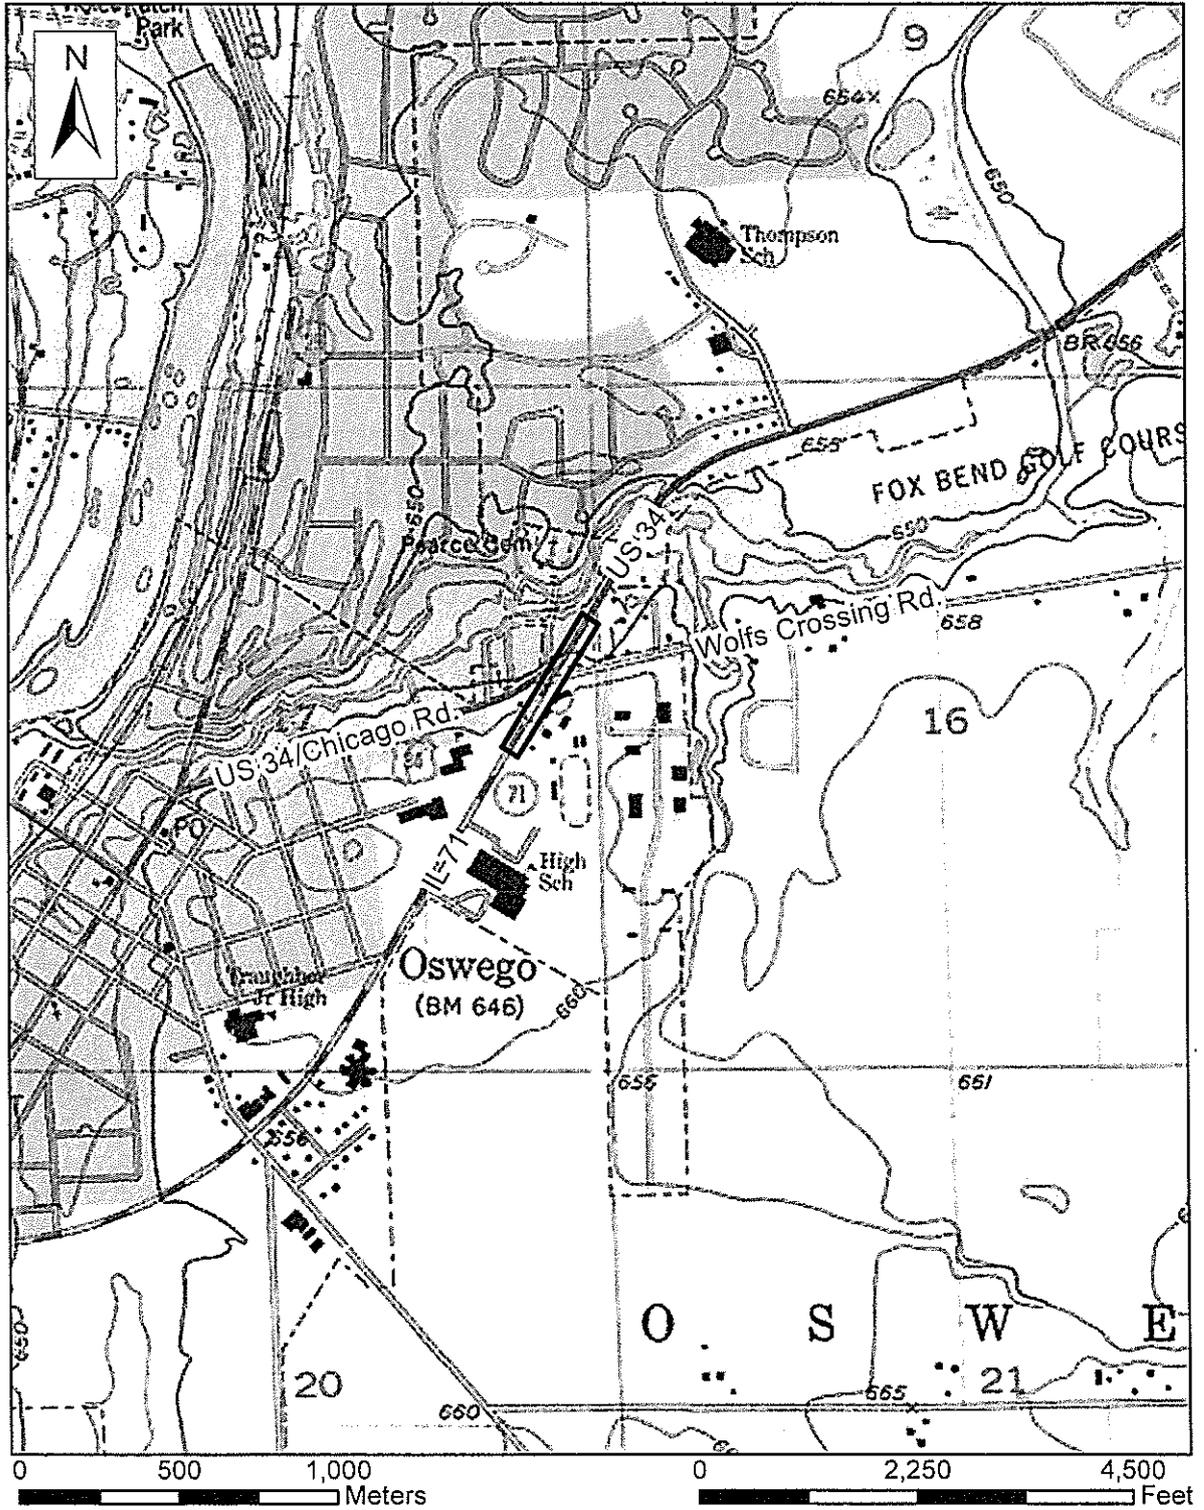

And the foregoing being subject to the rights of the public and of the People of the State of Illinois, in and to that part of the land dedicated for public highway by dedication dated December 21, 1932, and recorded April 7, 1933 in Deed Record 86, page 176, from Lyman Pearce and Millie F. Pearce, to the People of the State of Illinois

- 2 Common Address: Route 34 & 71, Oswego, Illinois
- 3 Real Estate Tax Index Parcel Index Number: 0317281009
- 4 Site Owner: Amoco Oil Company #9824
- 5 Land Use Limitation: Not Applicable
- 6 See NFR letter for other terms

2.0 EXECUTIVE SUMMARY

GSG has completed a Preliminary Environmental Site Assessment (PESA) for the proposed Wolfs Crossing Road from the Walter Payton Memorial Highway (US-34) to South Eola Road project. Alfred Benesch & Company (Benesch) is preparing a Phase I study for Wolfs Crossing Road, from IL-34 to Eola Road, in Oswego, Kendall County and Aurora, Will County, IL

The general scope of the overall project is anticipated to improvements to Wolf's Crossing Road, between US Route 34 to Eola Road in Oswego, IL. The improvements will also include intersections along this route at US 30, Douglas Road, Fifth Street, Roth Road and Harvey Road. The overall project plans for the widening of Wolf's Crossing to five lanes, from the current two lane road. The intersection improvements may include new roundabouts and/or traffic signals. Overall improvements will include sidewalks, bicycle paths, landscaped medians and street lighting. The overall project length is approximately 4.1 miles.

The PESA includes Wolf's Crossing Road, from the east side of the intersection of Wolf's Crossing Road and Walter Payton Memorial Highway (US-34)/IL-71, on the west end to the west side of the intersection of Wolf's Crossing Road and Lincoln Highway (US-30). The project area continues from the east side of the intersection of Wolf's Crossing Road and Lincoln Highway, east of the intersection of Wolf's Crossing Road and Eola Road/Heggs Road.

This report identifies and evaluates Recognized Environmental Conditions (RECs) and Potentially Impacted Properties (PIPs) that may be indicative of releases or potential releases of hazardous substances on, at, in, or adjacent to the proposed project.

The following tables present a list of sites that were evaluated as part of this report. **Table 1** presents a list of sites along the project for which RECs / PIPs were identified. **Table 2** presents a list of sites along the project for which only *de minimis* conditions were identified. **Table 3** presents a list of sites along the project for which no RECs/PIPs or *de minimis* were identified. **Table 4** presents a list of sites adjacent, but on the project, that were identified on environmental databases or historic map reviews. Sites identified with RECs or PIPs may require additional investigations.

Table 1. The following sites along the project were determined to contain RECs:

Property Name	PESA Site #	REC(s)	Regulatory Database(s)	Land Use
Speedway #1417	2	Existing gas station, historic LUST incident, historic generator of solid waste	RCRA-CESQG, LUST, UST, Tier 2, BOL	Commercial
Fox Bend Golf Course	13	Historic LUST incident	LUST	Recreational
Vacant Parcel	19	Unknown fill	None	None/Residential
Vacant Land	23	Unknown fill	None	None/Residential
Vacant Parcel	62	Unknown fill	None	None/Residential
Residential Property	65	Potential unregulated salvage yard	None	Residential
Residential Property	68	Potential unlicensed dump	None	Residential
Residential Property and agricultural land	78	Unknown fill	None	Residential/Agricultural

Table 2. The following sites along the project were determined to contain *de minimis* conditions:

Property Name	PESA Site #	<i>De minimis</i> Condition(s)	Land Use
Residential Properties	3	Potential presence of ACMs and LBP	Residential
Residential Property	5	Potential presence of ACMs and LBP	Residential
Residential Property	9	Potential presence of ACMs and LBP	Residential
Residential Property	10	Potential presence of ACMs and LBP	Residential
Residential Property and Agricultural Land	12	Potential presence of ACMs and LBP Potential presence of pesticides and herbicides	Residential/Agricultural
Residential Property	17	Potential presence of ACMs and LBP	Residential
Residential Property and Agricultural Land	27	Potential presence of ACMs and LBP	Residential/Agricultural

Property Name	PESA Site #	<i>De minimis</i> Condition(s)	Land Use
Agricultural Land	29	Potential presence of pesticides and herbicides	Agricultural
Residential Property and Agricultural Land	30	Potential presence of ACMs and LBP, potential presence of pesticides and herbicides	Residential/Agricultural
Wheatland Salem Church	31	Potential presence of ACMs and LBP	Community/Religious
Residential Property and Agricultural Land	32	Potential presence of ACMs and LBP, potential presence of pesticides and herbicides	Residential/Agricultural
Residential Property and Agricultural Land	34	Potential presence of ACMs and LBP, potential presence of pesticides and herbicides	Residential/Agricultural
Residential Property	35	Potential presence of ACMs and LBP, transformers	Residential
Prescott Mill West	37	Transformers	Residential
Agricultural Land	40	Potential presence of pesticides and herbicides	Agricultural
Residential Properties	41	Potential presence of ACMs and LBP	Residential
Speedway #2120	42	Active gas station with 6 USTs	Commercial/Gas Station
Crossroads Community Church Offices	43	Transformers, potential presence of ACMs and LBP	Community/Religious
Wolf's Crossing Plaza	47	Potential presence of ACMs and LBP, transformers	Commercial
Oswego High School Maintenance	48	Potential presence of ACMs and LBP, presence of two (2) ASTs	Educational
Residential Property	52	Potential presence of ACMs and LBP	Residential
Residential Properties	54	Potential presence of ACMs and LBP	Residential
Southbury Homes	55	Transformers	Residential
Residential Property and Agricultural Land	58	Potential presence of ACMs and LBP, potential presence of pesticides and herbicides	Residential/Agricultural
Residential Property	59	Potential presence of ACMs and LBP	Residential
Residential Property and Agricultural Land	60	Potential presence of ACMs and LBP	Residential/Agricultural

Property Name	PESA Site #	<i>De minimis</i> Condition(s)	Land Use
		Potential presence of pesticides and herbicides	
Agricultural Land	61	Potential presence of pesticides and herbicides	Agricultural
Valley Baptist Church	64	Potential presence of ACMs and LBP	Community/Religious
Residential Property	66	Potential presence of ACMs and LBP	Residential
Residential Property	67	Potential presence of ACMs and LBP	Residential
Residential Property	69	Potential presence of ACMs and LBP	Residential
Residential Property	70	Potential presence of ACMs and LBP	Residential
Agricultural Land	71	Potential presence of pesticides and herbicides	Agricultural
Agricultural Land	72	Potential presence of pesticides and herbicides	Agricultural
Agricultural Land	73	Potential presence of pesticides and herbicides	Agricultural

Man-made Lake	57	Recreation
Douglas Road South	63	Transportation
Vacant Land/Parking Lot	74	Vacant/Undeveloped land and parking lot
Roth Road	75	Transportation
Residential	77	Residential

Property Name	PESA Site #	Land Use
Wolf's Crossing Elementary School	87	Education
Residential Property	88	Residential

Table 4. The following additional sites, adjoining to but not on the project, were identified on environmental databases:

Property Name	REC(s), including <i>de minimis</i> conditions	Regulatory database(s)	Land Use
Walgreen's #5824	Generator of solid waste	RCRA-CESQG, FINDS, ECHO	Commercial
Amoco Oil Company #9524	Former gas station with LUST incident, generator of solid waste	RCRA-SQG, LUST, UST, FINDS, ECHO	Commercial
Owsego Township Highway Department	Historic presence of USTs	UST	Commercial
KR&G Excavating Partners	Generator of solid waste, historic presence of USTs	RCRA-SQG, UST	Commercial
Liqui Trol Systems, Inc.	Generator of solid waste	RCRA-SQG, FINDS, ECHO	Commercial

Where REC(s) are indicated as present, a condition was noted that may be indicative of releases or potential releases of hazardous substances on, at, in, or adjacent to the site, as discussed in the text. Potential hazards were not verified otherwise as part of this PESA. Site identified with RECs or PIPs may require additional investigations to determine soil handling and management during construction.

Where RECs are not indicated as present, radon, biological hazards (such as mold, medical waste, or septic waste), and non-agricultural pesticides and/or herbicides may still be of concern. No further investigation concerning the presence or use of these factors was conducted for this PESA.

For the purposes of this report, the following are considered to be *de minimis* conditions:

- Normal use of lead-based paint (LBP) on exteriors and interiors of buildings and structures
- Use of asbestos-containing materials (ACM) in building construction
- The presence of USTs with no reported releases

- Transformers in normal use, unless the transformers were observed to be leaking, appear on an environmental regulatory list, or were otherwise determined to pose a hazard not related to normal use
- Most land in Illinois was under agricultural use prior to its conversion to residential, industrial, or commercial development. Pesticides both regulated and otherwise, may have been used throughout the project area at any time. Unless specifically discussed elsewhere in this report, no information regarding past pesticide use that would be subject to enforcement action was located for this project and such use is considered a *de minimis* condition.

Radon and biological hazards are not considered in this PESA unless specifically noted. Although potential natural hazards, if present, are described in this report, they are not considered as RECs or *de minimis* conditions for the purposes of this report, and are therefore not listed in the tables above.

3.0 BACKGROUND

3.1 Introduction

This report presents the results of a PESA for proposed improvements associated with Wolf's Crossing Road in Oswego, Kendall County and in Aurora, Will County, Illinois. The general scope of the overall project is anticipated improvements to Wolf's Crossing Road, between US Route 34 to Eola Road in Oswego, IL. The improvements will also include intersections along this route at US 30, Douglas Road, Fifth Street, Roth Road and Harvey Road. The overall project plan's for the widening of Wolf's Crossing to five lanes, from the current two lane road. The intersection improvements may include new roundabouts and/or traffic signals. Overall improvements will include sidewalks, bicycle paths, landscaped medians and street lighting. The overall project length is approximately 4.1 miles.

The project area is generally situated in the northern portion of Kendall County, in the west side of the Village of Oswego and in the southeast corner of the City of Aurora, 7 miles south of I-88. Noteworthy landmarks in the vicinity are the Fox River, approximately 0.65 miles west of the western extent of the project area, Clow International Airport, located approximately 7 miles to the west, the Des Plaines River, located approximately 10.5 miles to the southeast and the Sandwich Fault Zone, located approximately 15 miles southwest of the project area.

While this report provides an overview of potential environmental concerns, both past and present, the PESA is limited by the availability of information at the time of the assessment. It is possible that unreported disposal of waste or illegal activities impairing the environmental status of the project area may have occurred which could not be identified. The conclusions and recommendations regarding environmental conditions that are presented in this report are based on a scope of work authorized by Benesch. Should additional information become available which differs significantly from our understanding of conditions presented in this report, we request that this information be brought to our attention so that we may reassess the conclusions provided herein.

This report identifies and evaluates RECs and PIPs that may be indicative of releases or potential releases of hazardous substances on, at, in, or to the proposed project. The report has been prepared using reasonably ascertainable sources, including historical and geological information including aerial photographs, U.S. Geological Survey (USGS) topographic maps, file information of the Illinois State Geological Survey (ISGS) and other state agencies, Sanborn fire insurance maps, and various other historical information sources. The regulatory database search consisted of a 1.0-mile search radius search for CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) and NPL (National Priority List) sites with a minimum 400-foot buffer zone for the remaining databases. An on-site visual reconnaissance including the target and adjoining properties with photographic documentation was completed as part of this assessment. The specific methods used to conduct the assessment are contained in "A Manual for Conducting

3.2 Topography

The 2012 USGS 7.5-minute Aurora South and Normantown Quadrangles show the project area to be sloping generally to the north-northwest. The project area is approximately 700 feet above sea level on the east side and approximately 650 feet above sea level on the west side.

3.3 Geology

3.3.1 Bedrock Geology

According to the "Geologic Map of Illinois" (1:500,000; Kolata 2005) bedrock in the project area consists of Silurian dolomite. GSG reviewed several published documents in an effort to determine the regional geological setting in the area of the project area. The bedrock in the Chicago area is overlain by glacial drift that was deposited by Pleistocene glaciers that repeatedly covered the area and by the various high-level states of Lake Michigan. The Pleistocene strata which underlies the study area as inferred from the "Surficial Geology of the Chicago Region" (Willman and Lineback, ISGS, 1970) consists of, from west to east, the Silurian Unconformity, the Batavia Member of the Henry Formation, the Marseilles-Huntly Ground Moraine and the Minooka Moraine. The Silurian unconformity is made up of the Racine, Waukesha, Joliet, Kankakee and Edgewater Formations and consists of "largely dolomite, slightly to moderately argillaceous with scattered chert nodules; Racine Formation contains larger reefs of massive to well bedded pure dolomite, minor beds of shale and shaley dolomite in lower part and locally bordering reefs in upper part; partially limestone in places near Kankakee Valley; fills pre-Silurian valleys as much as 100 feet deep in Maquoketa Shale in some areas." The Batavia Member consists of "sand and gravel, well sorted; deposits in uplands; deposits of glacial meltwater rivers and streams in outwash plains." The Marseilles-Huntley Ground Moraine and the Minooka Moraine are both part of the Yorkville Member of the Wedron Formation, consisting of "mostly gray to dark gray clayey till, locally silty clayey till; contains abundant small pebbles (especially in Marseilles Drift), local lenses of silt and less commonly lenses of sand and gravel." Additionally, "the till in older moraines (Huntley... Marseilles... and Minooka) is slightly more clayey and darker in color than the younger moraines."

3.3.2 Surficial Geology

Overlying the Pleistocene deposits are surficial soil deposits which, according to the General Soil Map of Kendall County, Illinois, (US Dept. of Agriculture, 1979), consist of glacial outwash in the east and glacial till in the west. The glacial outwash material is mainly medium to fine silts and silty clay loams, with poor drainage. The glacial till material was developed from a combination of loess and glacial till. The soil is very strongly influenced by the kind of till beneath it. In the project area, it is a loam or silt loam.

According to the “Potential for Contamination of Shallow Aquifers in Illinois,” (Richard C. Berg, John P. Kempton, ISGS, 1984), the project area is located within, from west to east, the AX, A2, C2, and E rating areas. The geologic materials in the AX rating area consist of “alluvium, a mixture of gravel, sand, silt and clay along streams, variable in composition and thickness.” The potential for contamination in this portion of the project area is “very high” because of their physical composition and their general presence near surface waters, allowing the easy discharge of groundwater. The geologic materials in the A2 rating area consist of “thick, permeable sand within 20 feet of land surface.” The potential for contamination in this portion of the project area is “high” because of high hydraulic conductivity, 1×10^{-3} cm/sec. The geologic materials in the C2 rating area consist of “sand and gravel within 2 to 50 feet of surface, underlain by till or other fine grained material.” The potential for contamination in this portion of the project area is “high to moderate” because due to their physical composition. The geologic materials in the E rating area consist of “uniform, relatively impermeable silty or clayey till or other fine-grained materials more than 50 feet thick; no sand and gravel identified.” The potential for contamination in this portion of the project area is “low” because of low hydraulic conductivity, 1×10^{-9} to 1×10^{-7} cm/sec and good attenuation capacities.

Based on the “Potential for Contamination of Shallow Aquifers by Surface and Near-Surface Waste Disposal” Plate, the project area is located, from west to east, within the AX, A2 and D2 rating areas. The geologic materials in the AX rating area consists of “Alluvium, a mixture of sand, gravel, silt and clay along streams, variable in composition and thickness.” The potential for contamination is “high”. The geologic materials in the A2 rating area consists of “permeable sand and gravel greater than 20 feet thick directly below land surface.” The potential for contamination is “high”. The geologic materials in the D2 rating area consists of “uniform, relatively impermeable silty or clayey till or other fine-grained materials extending from the surface to more than 20 feet deep; no interbedded sand and gravel.” The potential for contamination is “low”.

3.4 Hydrogeology

No site-specific hydrogeologic information was identified during the course of this assessment. Actual groundwater flow directions and depths in the vicinity of the project area cannot be determined without site-specific groundwater monitoring data. In lieu of this data, estimations were made herein based on surface gradient depicted on USGS topographic maps since it is generally recognized that shallow groundwater regionally mimics surface topography with flow toward existing surface water bodies such as rivers and creeks.

The Summary of the Geology of the Chicago Area (Willman 1971) describes shallow groundwater in the Chicago area as being limited to sand and gravel horizons in unconsolidated soil and fractured bedrock aquifers. The unconsolidated materials in this area consist primarily of clay with isolated lenses of sand material and are not considered aquifers. In the Chicago area, bedrock aquifers are found within Silurian, Ordovician and Cambrian formations, which are greater than 50 feet bgs.

GSG reviewed published geologic information to develop an understanding of site geology and anticipated groundwater flow direction. Groundwater flow can be locally impacted by utilities, wells, or other man-induced changes, but generally corresponds with surface topography. The 2012 USGS 7.5-minute Aurora South and Normaltown Quadrangles show the project area to be sloping generally to the north-northwest, generally toward the Fox River.

4.0 DISCUSSION

4.1 *Man-Made Hazards*

The project is located in an area dominated by residential properties and office parks, with some undeveloped land/forest preserves. Findings for each of the individual sites are described in the following subsections and illustrated on the referenced attachments. Field work for this assessment was conducted on September 1, 2017 and included a visual assessment only; no sampling or testing was performed.

The following data gaps applicable to the entire project were identified:

- No Sanborn Fire Insurance Map coverage was available for the project area or the surrounding properties.
- Aerial photographs provided information only for those specific times covered by the photographs as identified in the References and Sources Consulted section of this report. No records were available for intervening years and land uses other than those identified herein may have occurred in these years.
- GSG did not have physical access to private properties around the project area. Such properties could only be observed from public vantage points.
- GSG submitted Freedom of Information requests to various agencies where RECs were determined to exist. At the time of issue of this report, some of the responses have not been received from those agencies. After receiving and reviewing the responses, GSG shall issue an addendum, if warranted.

The findings and site-specific data gaps (if any) for each individual site are discussed in the following subsections.

4.1.1 **Site 1 Wolf's Crossing Road**

Wolf's Crossing Road, Oswego and Aurora. This site consists of the Wolf's Crossing Road ROW, which runs from the east side of side of the intersection of Wolf's Crossing Road and US-34/IL-71, to the west side of the intersection of Wolf's Crossing Road and Lincoln Highway (IL-30), and from the east side of the intersection of Wolf's Crossing Road and Lincoln Highway to east of the intersection of Wolf's Crossing Road and South Eola Road/South Heggs Road. The site consists of a two-lane asphalt paved road, with an extra turning lane/median east of Lincoln Highway.

Available historical aerial photographs from 1939 to 2015 depict the site as being a road, as it is seen in its current configuration.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Due to the absence of any buildings, neither ACM nor LBP are likely to be present at the site.

No RECs or *de minimis* conditions were identified for this site.

4.1.2 Site 2 Speedway #1417

Speedway, 4032 US-34, Oswego. The site is a gas station and convenience store. The site consists of a one-story brick and cinderblock convenience store with a pump island canopy over five (5) pump islands. There are five (5) additional pumps located along the east side of the site, for diesel and high grade gasoline. The USTs are located in the concrete driving area on the east side of the site, with vent pipes present on the fence along the north side of the site.

Available historical aerial photographs from 1939 depict the site as being occupied by a single building of unknown use. Sometime between 1939 and 1946, a single-story commercial building with an associated parking lot (along US-34) and two (2) residential buildings (along Wolf's Crossing Road) were constructed. These buildings remain present until sometime between 1952 and 1973 when the residential buildings were replaced by a single commercial property and an associated parking lot. Two (2) additional buildings are built on the east side of the site between 1973 and 1978 and 1978 and 1984, respectively. These appear to be one-story commercial buildings. Sometime between 1999 and 2007, all of these buildings were razed and the buildings that are currently present at the site were built.

The site appears on the following databases: Historic Auto (Gas Service Station), RCRA-CESQG, LUST, UST, Tier 2 and BOL. The site is listed in the Historic Auto database under the name Gas City Ltd. The site was listed as a Gas Service Station for the years 2001 through 2013.

The site is listed under the name Speedway #1417 in the RCRA-CESQG, LUST, UST, Tier 2 and BOL databases. The site is listed in the RCRA-CESQG database as a generator of Code D001 (ignitable waste) and D018 (benzene) wastes. No violations were reported for the site. The site is listed in the Tier 2 database for the years 2011 (light petroleum distillate and kerosene), 2012 (light petroleum distillate, kerosene and E-85), 2013 (E-85 and kerosene), 2014 (E-85 and kerosene) and 2015 (Flex Fuel and kerosene).

The site is listed in the LUST database for incident number 20000347, a release of “Other Petroleum,” on March 1, 2000. The incident was closed with a Section 57.5(g) letter (pre-1974 heating oil tank) on June 9, 2000. The site is listed in the UST database for the following USTs currently in use: one (1) 12,000-gallon gasoline UST; two (2) 8,000-gallon gasoline USTs; one (1) 8,000-gallon biodiesel UST; one (1) 2,000-gallon E-85 gasoline UST; and one (1) 2,000-gallon kerosene UST. One (1) 550-gallon heating oil UST is listed for the site but is exempt from registration.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Due to the age of the building, ACM and LBP are not likely to be present.

The following REC was identified for the site:

- A LUST incident (20000347) for a heating oil UST. The incident was closed with a pre-1974 certification, but impacted soil may still be present at the site.

The following *de minimis* condition has been identified for this site:

- The site is an active gas station with at least six (6) USTs

4.1.3 Site 3 Residential Properties

Residential properties, 3933 to 3953 Wolf’s Crossing Road, Oswego. The site consists of two (2) residential properties and a vacant lot. The first property, located at 3953 Wolf’s Crossing Road, is a one story multi-family brick building with accompanying driveway and landscaped areas. The second property, located at 3933 Wolf’s Crossing Road, is a two-story single-family wood and brick building with accompanying driveway and landscaped areas.

Available historical aerial photographs depict the site as undeveloped land from sometime before 1939 until 1952. The building located at 3953 Wolf’s Crossing Road was built sometime between 1952 and 1973. The building at 3933 Wolf’s Crossing Road was built sometime between 1973 and 1978. The remaining photographs depict the site similar to its appearance at the time of the site visit.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based on the date of construction of the buildings at

the site, being built sometime between 1952 and 1978, both ACM and LBP may be preset in the buildings at the site.

No RECs were identified for the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of ACM and LBP.

4.1.4 Site 4 Hawthorn Drive

Hawthorn Drive, Oswego. The site consists of the Hawthorn Drive ROW, which runs north from the intersection of Hawthorn Drive and Wolf's Crossing Road. The site consists of a two-lane asphalt road.

Available historical aerial photographs from 1939 until sometime before 1973 depict the site as undeveloped land. Sometime between 1952 and 1973 the current roadway was constructed.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Due to the absence of any buildings, neither ACM nor LBP are likely to be present at the site.

No RECs or *de minimis* conditions were identified for this site.

4.1.5 Site 5 Residential Property

Residential Property, 8 Hawthorn Drive, Oswego. The site is a bi-level single-family home with an attached garage and associated landscaped areas.

Available historical aerial photographs from 1939 to 1952 depict this site as undeveloped land. The current building was built sometime between 1952 and 1973.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the

site during the September 1, 2017 site visit. Based on the date of construction of the building, sometime between 1953 and 1972, both ACM and LBP may be preset in the building at the site.

No RECs were identified for the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of ACM and LBP.

4.1.6 Site 6 Residential Property

Residential Property, 3737 Wolf's Crossing Road, Oswego. The site is a two-story single family home with an attached garage and associated landscaped areas. The building is rectangular and appears to be of brick and cinderblock construction.

Available historical aerial photographs depict the site as residential property since at least 1939. From sometime before 1939 until sometime before 1998, the site is depicted as being occupied by a single-family home along Wolf's Crossing Road, with the remainder of the site being undeveloped land. Sometime before 1998, the existing home was built on the southern portion of the property. During sometime between 1999 and 2007, the former single family home along Wolf's Crossing was razed, leaving the site in its current condition.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based on the date of construction of the building, being built sometime between 1988 and 1998, neither ACM nor LBP are likely to be preset in the building at the site.

No RECs or *de minimis* conditions were identified for this site.

4.1.7 Site 7 Residential Property

Residential Property, 3725 Wolf's Crossing Road, Oswego. The site consists of a single family home with an attached garage, a shed, and associated landscaped areas. The house is rectangular and appears to be made of wood.

Available historical aerial photographs from 1939 until 1984 depict the site as undeveloped woodland. The current structure was built at the site sometime between 1984 and 1988.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the age of the building, neither ACM nor LBP are suspected to be present at the site.

No RECs or *de minimis* conditions were identified for this site.

4.1.8 Site 8 Residential Property

Residential property, 3643 Wolf's Crossing Road, Oswego. The site consists of a two-story single family home with an attached garage and associated landscaped areas. The building is rectangular and appears to be of brick and cinderblock construction.

Available historical aerial photographs from 1939 until 1984 depict the site as undeveloped woodland. The current structure was built at the site sometime between 1984 and 1988.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the age of the building, neither ACM nor LBP are suspected to be present at the site.

No RECs or *de minimis* conditions were identified for this site.

4.1.9 Site 9 Residential Property

Residential property, 3515 Wolf's Crossing Road, Oswego. The site consists of a single family home with an attached garage and associated landscaped areas. The house is rectangular and appears to be made of brick.

Available historical aerial photographs from 1939 until 1946 depict the site as undeveloped woodland. Sometime between 1946 and 1952, three buildings were present at the site. Sometime between 1952 and 1973, those buildings were razed. The current structure was built at the site sometime between 1973 and 1978.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the age of the building, both ACM and LBP are potentially present at the site.

No RECs were identified at the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of ACM and LBP.

4.1.10 Site 10 Residential Property

Residential Property, 3437 Wolf's Crossing Road, Oswego. The site consists of a single family home with an attached garage, associated landscaped areas, and is surrounded by a wooden fence. The building is L-shaped and appears to be of wood construction. Based upon the aerial photographs, but not visible from areas visible from public right of ways, a large pond is present in the northwest portion of the site.

Available historical aerial photographs from 1939 until 1952 depict the site as undeveloped land. The current structure was built sometime between 1952 and 1973. A pond is present in the northeast corner of the site from sometime before 1978 until sometime before 2007, when it was backfilled. The current pond in the northwest corner of the site was excavated sometime between 2012 and 2015.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the age of the building, both ACM and LBP are potentially present at the site.

No RECs were identified at the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of ACM and LBP.

4.1.11 Site 11 Residential Property

Residential property, 3429 Wolf's Crossing Road, Oswego. The site is a two-story single-family home with a large detached garage and associated landscapes areas. The buildings are rectangular, with the house appearing to be made of brick and wood, and the garage appearing to be made of wood.

Available historical aerial photographs from 1939 to sometime before 1973 depict the site as agricultural land. From sometime before 1973 until sometime before 1998, the site is depicted as undeveloped land. The house was built at this site sometime between 1988 and 1998, with the garage being built at sometime between 1999 and 2007.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the age of the building, neither ACM nor LBP are suspected to be present at the site.

No RECs or *de minimis* conditions were identified for this site.

4.1.12 Site 12 Residential Property and Agricultural Land

Residential property and agricultural land, 3425 Wolf's Crossing Road, Oswego. The site consists of a one-story single family home with an attached garage, associated landscaped areas and a corn field. The site is triangular in shape, with the larger end on the west side. The house is located on the west side of the site, and the field is located on the east side.

Available historical aerial photographs from 1939 until 1952 depict the site as being undeveloped land. The current structure at the site was built sometime between 1952 and 1973.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the age of the building, both ACM and LBP are potentially present at the site.

No RECs were identified at the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of ACM and LBP.
- Potential presence of herbicides and pesticides throughout the portion of the site utilized as a corn field.

4.1.13 Site 13 Fox Bend Golf Course

Fox Bend Golf Course, 3516 US-34, Oswego. The site consists of a golf course, with the clubhouse on the far northwest side of the site, along US-34. The portion of this site that is along the project area consists of two golf holes and their respective greens, fairways and sand bunkers.

Available historical aerial photographs from 1939 until 1952 depict the site as agricultural land, with a residential property along US-34. The course was built between sometime after 1952 and sometime before 1973, with the clubhouse replacing the residential property along US-34.

The site is listed in the LUST database for incident number 923638. The incident is associated with for a gasoline spill. No further information was available from the database search. GSG submitted FOIA requests to the Illinois Environmental Protection Agency (IEPA) and the Office of the Illinois State Fire Marshall (OSFM) regarding this incident, but the IEPA had no information on file and the OSFM has not responded at the time this report was issued.

GSG accessed the OSFM database

(<http://webapps.sfm.illinois.gov/ustsearch/Facility.aspx?ID=2025357>), which indicated that two (2) 1,000-gallon gasoline USTs were removed from the site at an unknown time. GSG accessed the IEPA LUST database (<http://www.epa.illinois.gov/topics/clean-up-programs/bol-database/leaking-ust/index>), which indicates a Notice of Release letter was issued on January 7, 1993. A 731 Call In letter, indicating that the LUST incident occurred before September 13, 1993, and therefore, the owner could elect not to proceed with any clean-up activities and effectively closing the incident.

No visual evidence of spills, stressed vegetation, depressions, surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Due to the absence of any buildings in the project area, neither ACM nor LBP are likely to be present at the site.

The following REC was identified with this site:

- A historic gasoline spill in 1992. Data provided by the IEPA indicated that the incident was closed without any clean-up activities occurring.

No *de minimus* conditions were identified in relation to this site.

4.1.14 Site 14 Churchill Club

Churchill Club, 101 Bluegrass Parkway, 202-218 Julep Avenue, Bluegrass Parkway, Oswego.

The site consists of ten (10) single family homes and Bluegrass Parkway. The homes are all typical of each other, and are two-story single family homes with attached garages, asphalt driveways and associated landscaped areas. The buildings appear to be of wood and brick construction. Bluegrass Parkway is a two-lane north-south running asphalt road with drainage along the concrete curb lines. The addresses that are present along the project area include the following:

- 101 Bluegrass Parkway
- 202-218 Julep Avenue (even numbers)

Available historical aerial photographs from 1939 through 1999 depict the site as agricultural land. Sometime between 1999 and 2007, construction began on the Churchill Club subdivision. Construction of all the houses along the project area was completed sometime between 2015 and the time of the site visit on September 1, 2017.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the age of the building, neither ACM nor LBP are expected to be present at the site.

No RECs or *de minimis* conditions were identified for this site.

4.1.15 Site 15 Douglas Road North

Douglas Road North, Oswego. Douglas Road North is a two lane asphalt roadway that runs north from the intersection with Wolf's Crossing Road. Drainage is directed toward the concrete curbs and the landscaped areas of sites 14 and 16.

Available historical aerial photographs from 1939 through 2015 depict the site as a road.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Due to the absence of any buildings, neither ACM nor LBP are likely to be present at the site.

No RECs or *de minimis* conditions have been identified for this site.

4.1.16 Site 16 Vacant Land

Vacant land, 2800 block of Wolf's Crossing Road. The site consists of lightly wooded vacant land at the northeast intersection of Douglas Road and Wolf's Crossing Road. The site consists of landscaped areas.

Available historical aerial photographs from 1939 through 2015 depict the site as lightly wooded vacant land.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Due to the absence of any buildings, neither ACM nor LBP are likely to be present at the site.

No RECs or *de minimis* conditions have been identified for this site.

4.1.17 Site 17 Residential Property

Residential property, 2707 Wolf's Crossing Road, Oswego. The site is occupied by a by a two-story single family home, a detached garage, a barn, and lightly wooded landscaped areas. The buildings all appear to be of wood construction.

Available historical aerial photographs from 1939 through 1988 depict the site as being occupied by the three (3) buildings currently present at the site and an additional barn on the east side of the site. That building was razed sometime between 1988 and 1998.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Due to the age of the buildings present at the site, both ACM and LBP are suspected to be present at the site.

No RECs were identified at the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of ACM and LBP.

4.1.18 Site 18 Residential Property

Residential property, 2501 Wolf's Crossing Road, Oswego. This site is occupied by a one-story single family residential property and a large barn. There are four (4) separate pasture areas across the front of the property, along the project area. Five (5) smaller outbuildings are present at the site, but aren't visible from areas accessible to the general public, and are only visible on aerial photographs. The home appears to be of wood and brick construction and the barn appears to be of wood construction. The construction of the outbuildings is unknown.

Available historical aerial photographs from 1939 through 1984 depict the site as being agricultural land. Sometime between 1984 and 1988 the house and the barn were constructed. The scale of the remaining aerial photographs is insufficient to determine when the other outbuildings were built.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Due to the age of the buildings, neither ACM nor LBP are likely to be present at the site.

No RECs or *de minimis* conditions have been identified for this part of the project.

4.1.19 Site 19 Vacant Parcel

Vacant Parcel, 2425 Wolf's Crossing Road, Oswego. The site is a heavily wooded. Based upon aerial photographs, the site was formerly occupied by two (2) separate residential properties. The west side of the property was occupied by a residential property and a barn. The east side of the property was occupied by a residential property with an attached garage. However, at the time of

the site visit, none of these buildings were visible from areas accessible to the general public. Based upon information provided by the Kendall County Assessor's Office (<http://gis.co.kendall.il.us/kendallviewer/>), the two residential properties were razed sometime between 2006 and 2010. One (1) pole-mounted transformer was identified near the former driveway for the residential property on the east side of the site. No signs of staining or stress vegetation were observed.

Available historical aerial photographs from 1939 through 1952 depict the site as agricultural land. Sometime between 1952 and 1973 the residential property on the east side of the site was built. Sometime between 1973 and 1978 the residential property on the west side of the site was built. Sometime between 1984 and 1988, the barn was built on the west side of the property. Sometime between 2007 and 2010 when the residential properties were razed and the area backfilled with unknown fill. The unknown origin of the fill material used to backfill the site is considered a REC.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, surface impoundments, stained soil or pavement, water discoloration, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. However, due to the heavy tree cover, GSG was not able to access the site.

The following REC was identified for this site:

- The nature of the fill material where the houses were located is unknown.

The following *de minimis* condition was identified for this site:

- One pole-mounted transformer on the south side of the site along Wolf's Crossing Road

4.1.20 Site 20 Cardinal Avenue

Cardinal Avenue, Oswego. Cardinal Avenue is a three-lane asphalt road running north from the intersection with Wolf's Crossing Road into the Churchill Club subdivision. The roadway has one lane running north and two lanes running south, becoming east and west turn lanes at the intersection with Wolf's Crossing Road. Drainage is along the concrete curbs running along the east and west side.

Available historical aerial photographs from 1939 through 1998 depict the site as agricultural land. The road was built sometime between 1998 and 2007.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the lack of building at the site, neither ACM nor LBP are suspected to be present at the site.

No RECs or *de minimis* conditions were identified for this site.

4.1.21 Site 21 Residential Property

Residential property, 583 Cardinal Avenue, Oswego. The site consists of a two-story single family residential property with an asphalt driveway, attached garage and associated landscaped areas. The building appears to be of brick construction.

Available historical aerial photographs from 1939 through 1998 depict the site as agricultural land. The residential property was built sometime between 1999 and 2007.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, surface impoundments, transformers, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based on the age of the building, neither ACM nor LBP are suspected to be present at this site.

No RECs or *de minimis* conditions have been identified for this site.

4.1.22 Site 22 Residential Property

Residential property, 2275 Wolf's Crossing Road, Oswego. The site consists of a one-story single family residential property with an asphalt driveway, an attached garage, and associated landscape areas. The building appears to be of brick construction.

Available historical aerial photographs from 1939 to 1988 depict the site as agricultural land. The current structure was built at this site sometime between 1988 and 1998.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, surface impoundments, transformers, stained soil or pavement, water discoloration, fill, storage tanks

(above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based on the age of the building, neither ACM nor LBP are suspected to be present at this site.

No RECs or *de minimis* conditions have been identified for this site.

4.1.23 Site 23 Vacant Land

Vacant land, 2209 Wolf's Crossing Road, Oswego. The site is an undeveloped parcel. Based upon information from aerial photographs, a residential property was formerly located at this site. At the time of the site visit, however, the site was heavily overgrown with vegetation and not accessible.

Available historical aerial photographs from 1939 to 1998 depict this site as a residential farm property with a home and four (4) outbuildings. Sometime between 1999 and 2007 the buildings at the site were razed. All that remains visible are two large concrete pads where buildings were formerly located. The unknown origin of the fill material used to backfill the site is considered a REC.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit.

The following REC was identified for this site:

- The nature of the fill material where the house and outbuildings were located is unknown.

No *de minimis* conditions were identified for this site.

4.1.24 Site 24 Residential Properties

Churchill Club, 730-750 Charismatic Drive, Oswego. The site is occupied by eleven (11) two-story single family homes. All of the houses have attached garages, asphalt driveways and associated landscaped areas. All the houses appear to be of brick and wood construction. One (1) pole-mounted transformer was located along the project area behind 748 Charismatic Drive. No sign of staining or stressed vegetation were observed at the time of the site visit.

Available historical aerial photographs from 1939 through 1998 depict the site as agricultural land. The residential properties were built sometime between 1999 and 2007.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based on the age of the buildings, neither ACM nor LBP are likely to be present at the site.

No RECs or *de minimis* conditions have been identified for this site.

4.1.25 Site 25 Secretariat Lane

Secretariat Lane, Oswego. Secretariat Lane is a three-lane asphalt road running north from the intersection with Wolf's Crossing Road into the Churchill Club subdivision. The roadway has one lane running north and two lanes running south, becoming east and west turn lanes at the intersection with Wolf's Crossing Road. Drainage is along the concrete curbs running along the east and west sides.

Available historical aerial photographs from 1939 through 1998 depict the site as agricultural land. The road was built sometime between 1998 and 2007.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the lack of building at the site, neither ACM nor LBP are suspected to be present at the site.

No RECs or *de minimis* conditions were identified for this site.

4.1.26 Site 26 Plank Junior High School

Plank Junior High School, 510 Secretariat Lane. The site consists of a two-story junior high school, with associated landscape and an asphalt parking lot that it shares with Churchill Elementary school, adjacent to the north. The building appears to be of brick and cinderblock construction.

Available historical aerial photographs from 1939 through 1998 depict the site as agricultural land. The school was built sometime between 1998 and 2007.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the lack of building at the site, neither ACM nor LBP are suspected to be present at the site.

No RECs or *de minimis* conditions were identified for this site.

4.1.27 Site 27 Residential Property and Agricultural Land

Residential property and agricultural land, 1625 Wolf's Crossing Road, Oswego. The site consists of a two-story single family residential property, six (6) outbuildings, a gravel driveway, two (2) grain silos, associated landscaped areas and agricultural land. The house and the five nearest outbuildings appear to be made of wood, the grain silo and the far western barn appear to be made of metal.

Available historical aerial photographs from 1939 to 1978 depict the site as being occupied by a residential property, five (5) outbuildings and agricultural land. The final barn west of the house and other out buildings were built sometime between 1978 and 1984.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the age of the building, both ACM and LBP are potentially present at the site.

No RECs were identified at the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of ACM and LBP.
- Potential presence of herbicides and pesticides throughout the portion of the site utilized as a field.

4.1.28 Site 28 Fifth Street

Fifth Street, Oswego. Fifth Street is a two-lane asphalt road running north from the intersection with Wolf's Crossing Road into the Churchill Club subdivision. The roadway has one lane running north and two lanes running south, becoming east and west turn lanes at the intersection with Wolf's Crossing Road. Drainage is along the concrete curbs running along the east and west side.

Available historical aerial photographs from 1939 through 1998 depict the site as agricultural land. The road was built sometime between 1998 and 2007.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the lack of building at the site, neither ACM nor LBP are suspected to be present at the site.

No RECs or *de minimis* conditions were identified for this site.

4.1.29 Site 29 Agricultural land

Agricultural land, 1500 block Wolf's Crossing Road, Oswego. The site is occupied by agricultural land that was being utilized to grow soy beans at the time of the site investigation.

Available historical aerial photographs from 1939 through 2015 depict this site as agricultural land.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Due to the absence of any buildings, neither ACM nor LPB are likely to be present at the site.

No RECs were identified at the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of herbicides and pesticides based on current and historic use as agricultural land.

4.1.30 Site 30 Residential Properties and Agricultural land

Residential properties and agricultural land, 1335-1405 Wolf's Crossing Road, Oswego. The site consists of two (2) single family houses, one (1) at 1335 Wolf's Crossing Road (a two-story house with a gravel driveway) and one (1) at 1405 Wolf's Crossing Road (a one-story house with and attached garage and an asphalt driveway), four (4) barns, associated landscaped areas and two (2) corn fields, on the east and west sides of the property. The home at 1405 Wolf's Crossing appears to be of brick and wood construction. The home at 1335 Wolf's Crossing appears to be of brick construction. Three (3) of the barns appear to be of wood and one (1) appears to be of metal construction.

Available historical aerial photographs from 1939 until 1952 depict the site with the house located at 1335 Wolf's Crossing Road and three (3) barns. The remainder of the site is depicted as agricultural land. Sometime between 1952 and 1973 the house at 1405 Wolf's Crossing Road was built on the west side of the site. The site remains unchanged until sometime between 1999 and 2007 when the barn north of the house at 1335 Wolf's Crossing Road was built.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the age of the buildings, both ACM and LBP are potentially present at the site.

No RECs were identified at the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of ACM and LBP.
- Potential presence of herbicides and pesticides throughout the portion of the site utilized as a field.

4.1.31 Site 31 Wheatland Salem Church

Wheatland Salem Church, 1217 Wolf's Crossing Road, Oswego. The site consists of a two-story church building, a two-story office building, a mobile trailer, a small playground and an asphalt parking lot. The church and office building appear to be of wood and brick construction and the trailer is of metal construction.

Available historical aerial photographs from 1939 to 1952 depict the site as being occupied by the church and a small parking lot. Sometime between 1952 and 1972 the two-story building adjacent

to the church is constructed and the parking lot is expanded. The property remains in this configuration until sometime between 1988 and 1998 when the parking lot is expanded to its current size and the playground is built.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the age of the buildings, both ACM and LBP are potentially present at the site.

No RECs were identified at the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of ACM and LBP.

4.1.32 Site 32 Residential Property and Agricultural land

Residential property and farm land, 1179 Wolf's Crossing Road, Oswego. The site is a residential property with associated landscaped areas, farm land and a concrete driveway. The site has a two-story residential property, with four (4) barns and four (4) silos. The residential property appears to be constructed of wood. The barns and the silos appear to be constructed of metal.

Available historical aerial photographs from 1939 to 1973 depict the site as agricultural property. Sometime between 1973 and 1978, the current structures were constructed at the site.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the age of the buildings, both ACM and LBP are potentially present at the site.

No RECs were identified at the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of ACM and LBP.

4.1.33 Site 33 Oswego East High School

Oswego East High School, 1525 Harvey Road, Oswego. The site consists of Oswego East High School, with associated parking lots, asphalt access roads, athletic fields and landscaped areas. The school is a two-story building of apparently brick and cinder block construction.

Available historical aerial photographs from 1939 to 1999 depict the site as agricultural property. Sometime between 1999 and 2007, the current structures were constructed at the site.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Due to the date of construction of the building, neither ACM nor LBP are likely to be present at the site.

No RECs or *de minimis* conditions were identified for this site.

4.1.34 Site 34 Residential Property and Agricultural land

Residential property and agricultural land, 909 Wolf's Crossing Road, Oswego. The site is a single family home. The site consists of a one-story residential property with a gravel driveway, a detached garage, four (4) barns, a horse corral and associated landscaped areas. The house, the garage and two (2) of the barns appear to be of wood construction. The two (2) remaining barns appear to be of metal construction.

Available historical aerial photographs from 1939 to 1972 depict the site as agricultural property. Sometime between 1972 and 1978 the house, the garage and the closest of the barns to the house were constructed. Sometime between 1978 and 1984 the horse corral was constructed. The site is unchanged until sometime between 1988 and 1998 when the remainder of the barns were constructed.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the age of the buildings, both ACM and LBP are potentially present at the site.

No RECs were identified at the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of ACM and LBP.

4.1.35 Site 35 Residential Property

Residential property and agricultural land, 809 Wolf's Crossing Road, Oswego. The site is a single-family home. The site consists of a one-story single-family home with an attached garage, an asphalt driveway and associated landscaped areas. The home appears to be of wood and brick construction. There is a pole-mounted transformer along Wolf's Crossing Road on the south side of the property. There were no signs of staining or stressed vegetation in the area around the transformer.

Available historical aerial photographs from 1939 to 1952 depict the site as undeveloped land. Sometime between 1952 and 1973 two (2) buildings were constructed at the site at the location of the house and the garage. Sometime between 1988 and 1998 an addition was constructed connecting the house and the garage, in the current configuration.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the age of the buildings, both ACM and LBP are potentially present at the site.

No RECs were identified at the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of ACM and LBP.
- One (1) pole-mounted transformer is located on the south side of the property along Wolf's Crossing Road. There were no signs of staining or stressed vegetation in the area around the transformer.

4.1.36 Site 36 Harvey Road

Harvey Road, Oswego. The site is a two-lane north-south running asphalt road. Drainage is via the gravel shoulders and landscaped areas of sites 35 and 37 on the north side of the project area and sites 81 and 82 on the south side of the project area.

Available historical aerial photographs from 1939 through 2015 depict the site as a road.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Due to the lack of buildings on the site, neither ACM nor LBP are suspected to be present at the site.

No RECs or *de minimis* conditions were identified for this site.

4.1.37 Site 37 Prescott Mill West

Prescott Mill West, Oswego. The site is located in the western portion of the Prescott Mill subdivision. The site consists of twenty (20) single-family homes. The buildings are all two-story residential buildings, with attached garages and associated landscaped areas. The houses are of apparently wood and brick construction. The homes are located at the following range of addresses:

- 245 to 276 Foster Drive
- 409 to 414 Baker Court

Three (3) pad-mounted transformers are present on the south side of the lots at 245 Foster Drive, 264 Foster Drive and 414 Baker Court. The transformers all appear to be in good condition, with no staining or stressed vegetation present at any location.

Available historical aerial photographs from 1939 to 1952 depict the site as being occupied by a residential property on the east side of the site and agricultural land on the remainder of the site. Sometime between 1952 and 1973, a second residential property was built in the center of the site. The site remained in this configuration until sometime between 1999 and 2007 when those buildings were razed and construction began on the current subdivision. Construction was completed in the portion of the site that abuts the project area sometime between 2007 and 2010.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Due to the date of construction of the buildings, neither ACM nor LBP are likely to be present at the site.

No RECs were identified for this site.

The following *de minimis* condition has been identified for this site:

- Three (3) pad-mounted transformer is located on the south side of the property along Wolf's Crossing Road. There were no signs of staining or stressed vegetation in the area around these transformers.

4.1.38 Site 38 Devoe Drive

Devoe Drive, Oswego. The site is a two-lane asphalt roadway, partially separated by a concrete and landscaped median, with two turn lanes at the intersection with Wolf's Crossing Road and provides access to the Prescott Mill subdivision. The road has a concrete curb and gutter, allowing runoff to flow into in street sewers.

Available historical aerial photographs from 1939 to 1999 depict the site as agricultural land. The current roadway was constructed sometime between 1999 and 2007.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Due to the lack of buildings, neither ACM nor LBP are likely to be present at the site.

No RECs or *de minimis* conditions have been identified for this site.

4.1.39 Site 39 Prescott Mill East

Prescott Mill East, Oswego. The site is located in the eastern portion of the Prescott Mill subdivision. The site consists of five (5) multi-family residential properties and a man-made lake. The buildings are all three-story multi-unit residential buildings, with attached garages, associated landscaped areas, and of apparently wood and brick construction. The homes are located at the following range of addresses:

- 402 to 450 Valentine Way

Available historical aerial photographs from 1939 to 1952 depict the site as being occupied by a residential property and agricultural land. The site remained in this configuration until sometime between 1999 and 2007 when the residential property was razed and construction began on the current subdivision. Construction was completed in the portion of this site that abuts the project area sometime between 2007 and 2010.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Due to the lack of buildings, neither ACM nor LBP are likely to be present at the site.

No RECs or *de minimis* conditions have been identified for this site.

4.1.40 Site 40 Agricultural land

Agricultural land, 200 Block of Wolf's Crossing Road, Oswego. The site is occupied by agricultural land that was utilized to grow soy beans at the time of the site investigation.

Available historical aerial photographs from 1939 through 2015 depict this site as agricultural land.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Due to the absence of any buildings, neither ACM nor LPB are likely to be present at the site.

No RECs were identified at the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of herbicides and pesticides based on current and historic use as agricultural land.

4.1.41 Site 41 Residential Properties

Residential properties, 139 to 75 Wolf's Crossing Road, Oswego. The site consists of four (4) single-family homes. 139 Wolf's Crossing Road is a one-story residential property with an attached garage, a gravel driveway and associated landscaped areas. The building appears to be of brick construction. 113 Wolf's Crossing Road is a one-story residential property with an attached garage, a gravel driveway and associated landscaped areas. The building appears to be of brick construction. 101 Wolf's Crossing Road is a two-story residential property with a detached garage, an asphalt driveway, a shed and associated landscaped areas. The house, garage and shed all appear to be of wood construction. 75 Wolf's Crossing Road is a two-story residential property with an attached garage, an asphalt driveway and associated landscaped areas. The house appears to be of wood construction.

Available historical aerial photographs from 1939 to 1952 depict the site as being occupied by three (3) residential properties, with a wooded area on the west side of the site. Sometime between 1952 and 1972, the wooded area was razed and a residential property was built. The site remains in this configuration until before the present day.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Due to the age of the building, ACM and LBP are suspected to be present.

No RECs were identified at the site.

The following *de minimis* condition has been identified for this site:

- Potential presence of ACM and LPB

4.1.42 Site 42 Speedway #2120

Speedway #2120, 1830 Route 30, Oswego. The site is currently a gas station. The site consists of a one-story building utilized as a convenience store, two (2) canopies covering seven (7) and three (3) pump islands, respectively, a concrete parking lot/driveway and associated landscaped areas. The UST basin is located on the east side of the building. The building appears to be of brick and cinder block construction.

Available historical aerial photographs from 1939 until 1946 depict the site as being occupied by a small building and a driveway that encircles it. Sometime between 1946 and 1952 an additional building is built to the northwest of the existing building. Sometime between 1952 and 1973, an additional building was built northwest of the existing building. Sometime between 1973 and 1978, the two (2) southern-most buildings were razed and replaced by one (1) new building. The site remains in this configuration until sometime between 1999 and 2007 when all buildings at the site are razed. The site remains vacant until sometime before 2015 when the current buildings were built at the site.

The site is listed in the UST database. The site is listed for the following USTs being present at the site: one (1) 20,000-gallon B-11 tank; one (1) 20,000-gallon gasoline tank; one (1) 12,000-gallon B-11 tank; one (1) 10,000-gallon diesel tank; one (1) 8,000-gallon gasoline tank; and one (1) 4,000-gallon E-85 tank.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Due to the date of construction of the building present at the site, ACM and LBP are not suspected to be present at the site.

No RECs were identified for the site.

The following *de minimis* conditions have been identified for this site:

- The current use of the site as a gas station, with six (6) USTs and pump islands.

4.1.43 Site 43 Crossroads Community Church Offices

Crossroads Community Church Offices, 3017 Lundquist Drive, Aurora. The site is currently utilized as the offices and a farm for the Crossroads Community Church. The site is currently occupied by a two-story residential building, a one-story office building, five (5) barns, three (3) silos, a small amount of agricultural land and associated landscaped areas.

Available historical aerial photographs from 1939 until 1952 depict the site as a residential and agricultural property, with access from the south. Sometime between 1952 and 1973, the current structures were constructed. With the construction of Lundquist Road sometime between 1999 and 2005, the site is now accessed from the east.

The site does not appear in any regulatory database reviewed.

No visual evidence of stressed vegetation, mounding or soil piles, lagoons or surface impoundments, stained pavement, water discoloration, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Due to the age of the building, ACM and LBP are suspected to be present.

No RECs were identified for the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of ACM and LPB.

4.1.44 Site 44 Lundquist Drive

Lundquist Drive, Aurora. The site is a two-lane generally north-south running asphalt roadway. The road has a concrete curb and gutter, allowing runoff to flow into in city sewers.

Available historical aerial photographs from 1939 to 1999 depict the site as agricultural land. The current roadway was constructed sometime between 1999 and 2007.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Due to the lack of buildings, neither ACM nor LBP are likely to be present at the site.

No RECs or *de minimis* conditions have been identified for this site.

4.1.45 Site 45 Crossroads Community Church

Crossroads Community Church, 3033 Lundquist Road, Aurora. The site is a church. The site consists of a large glass and brick church building, with associated landscaped areas, asphalt parking lot, a ponds on the south and northwest sides, and several athletic fields (two baseball fields, a basketball court and a sand volleyball court).

Available historical aerial photographs depict the site as agricultural land from 1939 until sometime before 2007. The current site buildings were constructed sometime between 2007 and 2012.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based on the date of construction of the building, neither ACM nor LBP is suspected to be present at the site

No RECs or *de minimis* conditions have been identified for this site.

4.1.46 Site 46 Eola Road/Heggs Road

Eola Road/Heggs Road, Aurora. The site is an asphalt roadway. North of Wolf's Crossing Road, the road is known as S. Eola Road, and is a four-lane asphalt road, separated by a concrete and landscaped divider. South of Wolf's Crossing Road, the road is known as Heggs Road and is a two-lane asphalt road with an east-bound turn lane at Wolf's Crossing Road. The road has a concrete curb and gutter, allowing runoff to flow into in city sewers.

Available historical aerial photographs from 1939 through 2015 depict the site as a road.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Due to the lack of buildings on the site, neither ACM nor LBP are suspected to be present at the site.

No RECs or *de minimis* conditions were identified for this site.

4.1.47 Site 47 Wolf Crossing Plaza

Wolf Crossing Plaza, 4050 Wolf's Crossing Road, Oswego. This site consists of a one-story wood and brick building and associated parking lot that's utilized as a shopping plaza, with the following stores:

- Jay's Liquor: prepackage liquor store and food mart
- Lotus Spa: a spa
- Vacant: a vacant office/retail space
- Jemi Gift Shop: a retail gift and shipping facility
- Yo's Barber Shop: barber shop and salon. This portion of the building appears to have been a later addition to the plaza, as the building is of different construction than the rest of the plaza.

Available historical aerial photographs from 1939 until sometime before 1973 depict the site as agricultural land. The property was developed into its current configuration sometime between 1952 and 1973.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. A total of three (3) pole-mounted transformers, one (1) on the east side and two (2) together on the south side of the site, were observed on utility poles at the property. There were no visible signs of staining or stressed vegetation in the areas around the transformers. Based upon the age of the building, both ACM and LBP are potentially present at the site.

No RECs were identified at the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of ACM and LBP.
- Three (3) pole-mounted transformers, two (2) along IL-71 and one (1) along Wolf's Crossing Road.

4.1.48 Site 48 Oswego High School Maintenance

Oswego High School Maintenance, 4006 Wolf's Crossing Road, Oswego. The site consists of three (3) metal barn-style buildings and a gravel parking area. Two (2) ASTs, one (1) gasoline and one (1) diesel, are present on the south side of the gravel area. This property is the maintenance yard for Oswego High School, adjacent to the south.

Available historical aerial photographs from 1939 to sometime before 1973 depict the site as agricultural land. Sometime before 1973, the two westernmost barns are depicted, along with the school and athletic field to the south. The site remains in this configuration until sometime before 1998 when the third barn is depicted.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the age of the building, both ACM and LBP are potentially present at the site.

No RECs or were identified at the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of ACM and LBP.
- Two (2) ASTs of unknown capacity, one (1) diesel fuel and one (1) gasoline

4.1.49 Site 49 Stone Hill Road

Stone Hill Road, Oswego. The site is a two lane asphalt road that is utilized to access the Stone Hill Industrial Park to the south of the project area. No median or shoulder is present for this road, and drainage is to the south via concrete curbs along the roadway.

Available historical aerial photographs from 1939 through 1946 depict the site as agricultural land. Sometime before 1952, the site has been developed as multi-unit residential properties. Sometime

between 1952 and 1973, additional structures are built to the east. By 1978, the structures to the east are gone and only a limited number of structures remain throughout the site. By 1984, Stone Hill Road is present in its current configuration.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the lack of buildings, neither ACM nor LBP are suspected to be present at the site.

No RECs or *de minimis* conditions were identified for this site.

4.1.50 Site 50 Residential Properties

Residential properties, 2 Stone Hill Road, 3852 Wolf's Crossing Road, and 3850 Wolf's Crossing Road. The site is three (3) residential properties. 2 Stone Hill Road is a two-story multi-family residential property with an attached garages and associated landscaped areas. The building appears to be of wood construction. 3852 Wolf's Crossing Road is a one-story U-shaped multi-family residential property, with attached garages and associated landscaped areas. The building appears to be of wood construction. 3850 Wolf's Crossing Road is a one-story rectangular single-family residential property, with attached garage and associated landscaped areas. The building appears to be of brick construction.

Available historical aerial photographs from 1939 to 1988 depict the site as being undeveloped land. Sometime between 1988 and 1998, the site is developed into its current configuration.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the ages of the buildings present at the site, neither ACM nor LBP are suspected to be present at the site.

No RECs or *de minimis* conditions were identified for this site.

4.1.51 Site 51 Rose Terrace Senior Apartments

Rose Terrace Senior Apartments, 3620 Wolf's Crossing Road, Oswego. This site consists of a two-story senior living/residential apartment building with two (2) large detached garages, an asphalt parking lot and associated landscaped areas.

Available historical aerial photographs from 1939 to 1988 depict the site as being undeveloped land. Sometime between 1988 and 1998, the site is developed into its current configuration.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the ages of the buildings present at the site, neither ACM nor LBP are suspected to be present at the site.

No RECs or *de minimis* conditions were identified for this site.

4.1.52 Site 52 Residential Property

Residential Property, 3790 Wolf's Crossing Road, Oswego. The site consists of a single family residential property with a detached garage and associated landscaped areas, with a pond and a heavily wooded area on the east side of the property.

Available historical aerial photographs from 1939 to 1946 depict the site as being undeveloped land, with only the pond present. Sometime between 1946 and 1952, the house and a driveway are depicted in their current location. The site remains in this configuration until sometime before 1988 when the garage is built.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the age of the house, both ACM and LBP are potentially present at the site.

No RECs were identified at the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of ACM and LBP.

4.1.53 Site 53 Residential Properties

Residential properties, 101 Dellan Lane, 102 Dellan Lane and Dellan Lane. The site consists of two (2) residential properties and a two-lane asphalt road. 101 Dellan Lane is a two-story single family residential property with an attached garage and associated landscaped areas. 102 Dellan Lane is a two-story single family residential property with an attached garage and associated landscaped areas. Dellan Lane is a two lane north-south running asphalt road, with a parking lane along each side of the street.

Available historical aerial photographs from 1939 to 1984 depict the site as agricultural land. The houses and the roadway were built sometime between 1984 and 1988.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the suspected ages of the houses, neither ACM nor LBP are likely to be present at the site.

No RECs or *de minimis* conditions have been identified for this site.

4.1.54 Site 54 Residential Properties

Residential properties, 3614 and 3530 Wolf's Crossing Road, Oswego. The site contains two (2) single family residential properties. 3614 Wolf's Crossing Road is a two-story single family home with an attached garage, a detached barn-style building west of the house, an asphalt driveway and associated landscaped areas. The house and barn appear to be of wood construction. 3530 Wolf's Crossing Road is a two-story single family home with an attached garage, an asphalt driveway and associated landscaped areas. The house appears to be of brick and wood construction.

Available historical aerial photographs from 1939 to 1946 depict the site as being occupied by three buildings, one house and two smaller, barn-style buildings. The house and the larger of the two barn-style buildings are in the same location as the two current day structures at 3614 Wolf's Crossing. The rest of the site is utilized as agricultural land. Sometime between 1946 and 1952, the smaller of the two barns is razed. The site remains in this configuration until sometime between 1988 and 1998 when the house at 3530 Wolf's Crossing was built.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the age of the buildings at 3614 Wolf's Crossing, both ACM and LBP are potentially present at that portion of the site.

No RECs were identified for the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of ACM and LBP.

4.1.55 Site 55 Southbury Homes

Southbury Homes, Oswego. Southbury Homes is a residential subdivision that's made up of twelve (12) single family homes. The buildings are all typical of each other, being two-story wood and brick structures with attached garages and associated landscaped areas. The following range of addresses are present along the project area:

- 304 and 305 Addison Court
- 247 through 253 Willington Way
- 201 through 205 Bolton Court
- 204 Bolton Court

There are two (2) pad mounted transformers present in the easement on the north side of the homes at 305 Addison Court and 253 Willington Way. No staining or stressed vegetation was observed in the area around the transformers.

Available historical aerial photographs from 1939 until 1999 depict the site as agricultural land. Sometime between 1999 and 2007, construction began on the subdivision.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the suspected ages of the houses, neither ACM nor LBP are likely to be present at the site.

No RECs have been identified for this site.

The following *de minimis* conditions have been identified for this site:

- The presence of two (2) pad-mounted transformers along the north side of the site.

4.1.56 Site 56 Southbury Boulevard

Southbury Boulevard, Oswego. The site is a three-lane north-south running asphalt roadway, with the lanes separated by a landscaped median. One (1) lane enters the site from the intersection with Wolf's Crossing Road, and two (2) lanes exit the site, becoming east and west turn lanes at the intersection with Wolf's Crossing Road.

Available historical aerial photographs from 1939 until 1999 depict the site as agricultural land. Sometime between 1999 and 2007, construction began on the subdivision.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Due to the absence of any buildings, neither ACM nor LBP are likely to be present at the site.

No RECs or *de minimis* conditions have been identified for this part of the project.

4.1.57 Site 57 Man-made Lake

Lake, 3200 block Wolf's Crossing Road, Oswego. The site is a man-made lake with a water fountain in it. The lake is part of the drainage from Southbury Boulevard and for the Sudbury Homes subdivision. The site is a manmade lake, surrounded by landscaped areas.

Available historical aerial photographs from 1939 until 1999 depict the site as agricultural land. Sometime between 1999 and 2007 the lake was constructed.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the

September 1, 2017 site visit. Due to the absence of any buildings, neither ACM nor LBP are likely to be present at the site.

No RECs or *de minimis* conditions have been identified for this part of the project.

4.1.58 Site 58 Residential Property and Agricultural Land

Residential property and agricultural land, 3170 Wolf's Crossing Road, Oswego. The site is occupied by a two-story residential property with an asphalt driveway and associated landscaped areas, a detached garage, a barn-style building, and a corn field on the south and east sides of the property. The house and the garage appear to be of brick and wood construction, and the barn appears to be of metal construction.

Available historical aerial photographs from 1939 through 2015 depict the site as a farm house and agricultural land. The garage and barn appear to have been built sometime between 1939 and 1946

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the age of the buildings, both ACM and LBP are potentially present at the site.

No RECs were identified at the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of ACM and LBP.
- Potential presence of herbicides and pesticides based on current and historic use as agricultural land.

4.1.59 Site 59 Residential Property

Residential property, 2996 Wolf's Crossing Road, Oswego. The site consists of a two-story single-family home, with an asphalt driveway, a detached garage and associated landscaped areas. The house and the garage appear to be of brick and wood construction.

Available historical aerial photographs from 1939 to 1952 depict the site as agricultural land. The current structures were built at the site sometime between 1952 and 1973.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, surface impoundments, transformers, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the age of the buildings, both ACM and LBP are potentially present at the site.

No RECs were identified at the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of ACM and LBP.

4.1.60 Site 60 Residential Property and Agricultural land

Residential property and agricultural land, 2822 Wolf's crossing Road, Oswego. The site consists of a two-story single family home with an asphalt driveway and associated landscaped areas, four (4) barn-style outbuildings, and agricultural land. The field area on the south side of the buildings and do not contact the project area. The home appears to be constructed of wood and brick and the outbuildings appear to be constructed of metal.

Available historical aerial photographs from 1939 through 1973 depict the site as being occupied by a house and three (3) outbuildings, with agricultural fields to the south. Sometime between 1973 and 1978 one (1) large barn on the west side of the site was constructed.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, surface impoundments, transformers, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the age of the buildings, both ACM and LBP are potentially present at the site.

No RECs were identified at the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of ACM and LBP.
- Potential presence of herbicides and pesticides based on current and historic use as agricultural land.

4.1.61 Site 61 Agricultural land

Agricultural land, 2700 block of Wolf's Crossing Road, Oswego. The site is occupied by agricultural land that was utilized to grow soy beans at the time of the site investigation.

Available historical aerial photographs from 1939 through 2015 depict this site as agricultural land.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Due to the absence of any buildings, neither ACM nor LPB are likely to be present at the site.

No RECs were identified at the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of herbicides and pesticides based on current and historic use as agricultural land.

4.1.62 Site 62 Vacant lot

Vacant lot, 2566 Wolf's Crossing Road, Oswego. The site is a vacant lot. Based upon aerial photographs, the site had previously been occupied by a single-family residential property on the west of the site near Douglas Road and a barn on the west side of the site.

Available historical aerial photographs from 1939 through 1952 depict this site as agricultural land. Sometime between 1952 and 1973 a residential property was constructed on the east side of the site and a barn was constructed on the west side of the site. These structures remained until sometime after 2015 when they were razed.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. While the buildings at the site are no longer present, the nature of the fill material, if any, utilized to fill their former locations is not known and should be considered a REC.

The following REC was identified for this site:

- The nature of the fill material where the house and outbuilding were located is unknown.

No *de minimis* conditions were identified for this site.

4.1.63 Site 63 Douglas Road South

Douglas Road South, Oswego. Douglas Road South is a two lane asphalt roadway that runs south from the intersection with Wolf's Crossing Road. Drainage is directed toward the gravel curbs and the landscaped areas of sites 63 and 65.

Available historical aerial photographs from 1939 through 2015 depict the site as a road.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Due to the absence of any buildings, neither ACM nor LBP are likely to be present at the site.

No RECs or *de minimis* conditions have been identified for this site.

4.1.64 Site 64 Valley Baptist Church

Valley Baptist Church, 2480 Wolf's Crossing Road, Oswego. The site consists a two-story church, a two-story residential property with an attached garage, an asphalt parking lot with a detached garage on the south side, and associated landscaped areas. The church building appears to have space for worship on the first floor and offices on the second floor. The church and the house both appear to be of brick construction. The detached garage appears to be made of metal.

Available historical aerial photographs from 1939 to 1952 depict the site as agricultural land. The current church building and parking lot were constructed sometime between 1952 and 1972. The residential property was constructed sometime between 1972 and 1978.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors

were noted at the site during the September 1, 2017 site visit. Based upon the age of the buildings, both ACM and LBP are potentially present at the site.

No RECs were identified at the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of ACM and LBP.

4.1.65 Site 65 Residential Property

Residential property, 2450 Wolf's Crossing Road, Oswego. The site consists of a one-story single family home with a driveway (constructed of gravel, concrete and brick), a barn, and associated landscaped areas. The area behind the house is enclosed in a wooden fence and is generally not visible from areas available to the general public. Based upon aerial photographs, the area within the fence includes the barn and several material storage cells, utilized for what appears to be sand, gravel and top soil. Additionally, there are a large number of vehicles of various kinds parked in the yard and what appears to be cubic containers of an unknown nature. The house appears to be of brick construction and the barn appears to be of metal construction.

Available historical aerial photographs from 1939 through 1952 depict the site as agricultural land. The home was built sometime between 1952 and 1973. The property remains unchanged until sometime between 1999 and 2007 when a barn is built on the south side of the property, behind the home. Sometime between 2010 and 2012, a large number of vehicles of an unknown nature are depicted around the barn.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the age of the buildings, both ACM and LBP are potentially present at the site.

The following REC was identified at the site:

- Potential presence of impacted surface and subsurface soils. The use of the area on the south side of the property as a potential unregulated automobile salvage yard, a potential unregulated material storage yard and/or as a potential parking lot for construction vehicles may have impacted the surface and subsurface soils at the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of ACM and LBP.

4.1.66 Site 66 Residential Property

Residential property, 2400 Wolf's Crossing Road, Oswego. The site is occupied by a one-story single family home with and attached garage, an asphalt driveway, a storage shed and associated landscaped areas. The house appears to be of brick construction and the shed appears to be of wood construction.

Available historical aerial photographs from 1939 through 1952 depict the site as agricultural land. The home was built sometime between 1952 and 1973. Sometime between 1973 and 1978 the current circular driveway was built.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the age of the building, both ACM and LBP are potentially present at the site.

No RECs were identified at the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of ACM and LBP.

4.1.67 Site 67 Residential Property

Residential property, 2374 Wolf's Crossing Road, Oswego. The site is one-story single family home with a U-shaped asphalt driveway and associated landscaped areas. The area of the property to the south of the house is enclosed in a wooden fence, blocking views of the rear of the property. Based upon aerial photographs, the enclosed area south of the house includes a gravel access road and a barn. The house appears to be of brick construction. It is unknown what materials the barn is composed of.

Available historical aerial photographs from 1939 through 1952 depict the site as agricultural land. The home was built sometime between 1952 and 1973. Sometime between 1984 and 1988 the access road and barn were built on the south side of the property.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the age of the buildings, both ACM and LBP are potentially present at the site.

No RECs were identified at the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of ACM and LBP.

4.1.68 Site 68 Residential Property

Residential property, 2340 Wolf's Crossing Road, Oswego. The site is occupied by a one-story single family residential property with an attached garage, an asphalt driveway, associated landscaped areas, and a barn on the south side of the home. There are gravel stockpiles on the east side the property, most likely utilized to refresh the driveway, as needed. The house appears to be of wood construction and the barn appears to be of wood and metal construction. Based upon aerial photographs, the area around the barn appears to be utilized as junk storage. However, this could not be confirmed via observations from areas accessible to the public.

Available historical aerial photographs from 1939 through 1952 depict the site as agricultural land. The barn was built sometime between 1952 and 1973. Sometime between 1973 and 1978 the house was built.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the age of the buildings, both ACM and LBP are potentially present at the site.

The following REC was identified at the site:

- Potential presence of impacted surface and subsurface soils. The potential use of the area on the east and south sides of the property as an unregulated dump may have impacted the surface and subsurface soils at the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of ACM and LBP.

4.1.69 Site 69 Residential Property

Residential property, 2300 Wolf's Crossing Road, Oswego. The site is a one-story single-family home with an attached garage, an asphalt driveway and associated landscaped areas.

Available historical aerial photographs from 1939 through 1952 depict the site as agricultural land. The home was built sometime between 1952 and 1973.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the age of the home, both ACM and LBP are potentially present at the site.

No RECs were identified at the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of ACM and LBP.

4.1.70 Site 70 Residential Property

Residential property, 2260 Wolf's Crossing Road, Oswego. The site is a two-story single family residential property with a detached garage, a gravel and asphalt driveway, and associated landscaped areas. Based upon aerial photographs, a second barn is present on the site south of the main barn. This area is not visible from areas accessible to the general public. The home appears to be made of wood and brick and the barn appears to be made of wood.

Available historical aerial photographs from 1939 through 1952 depict the site as agricultural land. The home was built sometime between 1952 and 1973. The barn was built sometime between 1988 and 1998. The second barn was built sometime between 1999 and 2007.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors

were noted at the site during the September 1, 2017 site visit. Based upon the age of the home, both ACM and LBP are potentially present at the site.

No RECs were identified at the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of ACM and LBP.

4.1.71 Site 71 Agricultural land

Agricultural land, 2200 block of Wolf's Crossing Road, Oswego. The site is occupied by agricultural land that was utilized to grow soy beans at the time of the site investigation.

Available historical aerial photographs from 1939 through 2015 depict this site as agricultural land.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Due to the absence of any buildings, neither ACM nor LPB are likely to be present at the site.

No RECs were identified at the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of herbicides and pesticides based on current and historic use as agricultural land.

4.1.72 Site 72 Agricultural land

Agricultural land, 2100 Block of Wolf's Crossing Road, Oswego. The site is occupied by agricultural land that was utilized to grow soy beans at the time of the site investigation.

Available historical aerial photographs from 1939 through 2015 depict this site as agricultural land.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Due to the absence of any buildings, neither ACM nor LPB are likely to be present at the site.

No RECs were identified at the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of herbicides and pesticides based on current and historic use as agricultural land.

4.1.73 Site 73 Agricultural land

Agricultural land, 2000 Block of Wolf's Crossing Road, Oswego. The site is occupied by agricultural land that was utilized to grow soy beans at the time of the site investigation.

Available historical aerial photographs from 1939 through 2015 depict this site as agricultural land.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Due to the absence of any buildings, neither ACM nor LPB are likely to be present at the site.

No RECs were identified at the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of herbicides and pesticides based on current and historic use as agricultural land.

4.1.74 Site 74 Vacant Land and Parking Lot

Vacant land and parking lot, 1400 block of Wolf's Crossing Road, Oswego. The site is currently occupied by undeveloped land and a gravel parking lot.

Available historical aerial photographs from 1939 through 1952 depict the site as agricultural land. From sometime after 1952 through sometime before 2015, the site is depicted mostly as undeveloped land, with the exception of the northeast corner of the site being turned into a parking lot sometime before 2015.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Due to the absence of any buildings, neither ACM nor LPB are likely to be present at the site.

No RECs or *de minimis* conditions have been identified for this site.

4.1.75 Site 75 Roth Road

Roth Road, Oswego. The site is a two lane north-south running asphalt road. The road has a gravel shoulder, allowing runoff to flow onto Sites 74 and 76.

Available historical aerial photographs from 1939 to 2015 depict the site as a road.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Due to the absence of any buildings, neither ACM nor LPB are likely to be present at the site.

No RECs or *de minimis* conditions have been identified for this site.

4.1.76 Site 76 Magical Garden

Magical Garden, 2152 Roth Road, Oswego. The site is a commercial greenhouse and landscape supply company. The site is occupied by a one-story retail building, a barn, an asphalt parking lot and agricultural land along Roth Road and Wolf's Crossing road. The retail building is located off of Roth Road, with the parking lot immediately south and the barn located east of it. The landscape supplies (The retail building appears to be of wood construction and the barn appears to be of metal construction.

Available historical aerial photographs from 1939 to 1998 depict the site as agricultural land. Sometime between 1999 and 2007, the property was developed into its current configuration.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Due to the age of buildings, neither ACM nor LBP are likely to be present at the site.

No RECs were identified at the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of herbicides and pesticides based on current and historic use as agricultural land.

4.1.77 Site 77 Residential Property

Residential property, 1116 Wolf's Crossing Road, Oswego. The site occupied by a one-story single family home with an attached garage, a storage building, a gravel driveway and associated landscaped areas. The storage building is located to the east of the garage, but is not visible from areas accessible to the general public and is only visible on aerial photographs. The house appears to be of brick and wood construction and the garage appears to be of metal construction. Based upon aerial photographs, the storage building appears to be of metal construction.

Available historical aerial photographs from 1939 to 1952 depict the site as agricultural land. Sometime between 1952 and 1973, the property was developed into its current configuration.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Due to the age of buildings, neither ACM nor LBP are likely to be present at the site.

No RECs or *de minimis* conditions have been identified for this site.

4.1.78 Site 78 Residential Property and Agricultural Land

Residential property and agricultural land, 1022 Wolf's Crossing Road, Oswego. The site is a heavily wooded, with agricultural land on the east side of the woods. Based upon aerial photographs, the site is occupied by a two-story single family residential property, a barn, a shed and a gravel driveway. However, at the time of the site visit, none of these buildings were visible from areas accessible to the general public. Based upon the aerial photographs, the agricultural land runs along the east side of the property and to the south of the house and barn.

Available historical aerial photographs from 1939 through 2015 depict the site as being occupied by a residential property with out buildings and farm land.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use

or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit.

The following REC was identified for this site:

- The nature of the fill material where the house and barn were located is unknown.

No *de minimis* conditions were identified for this site.

4.1.79 Site 79 Residential Property

Residential property, 1004 Wolf's Crossing Road, Oswego. The site consists of a one-story single family residential property with an attached garage, two storage buildings, an asphalt driveway and associated landscaped areas. The residential property appears to be of brick construction and the storage buildings appear to be constructed of metal.

Available historical aerial photographs from 1939 through 1952 depict the site as being agricultural land. Sometime between 1952 and 1973 the residential property was built.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the age of the home, both ACM and LBP are potentially present at the site.

No RECs were identified at the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of ACM and LBP.
- Potential presence of herbicides and pesticides based on current and historic use as agricultural land.

4.1.80 Site 80 Agricultural land

Agricultural land, 900 block of Wolf's Crossing Road, Oswego. The site is occupied by agricultural land that was utilized to grow soy beans at the time of the site investigation.

Available historical aerial photographs from 1939 through 2015 depict this site as agricultural land.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Due to the absence of any buildings, neither ACM nor LPB are likely to be present at the site.

No RECs were identified at the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of herbicides and pesticides based on current and historic use as agricultural land.

4.1.81 Site 81 Agricultural land

Agricultural land, 700 block Wolf's Crossing Road, Oswego. The site is occupied by agricultural land that was utilized to grow soy beans at the time of the site investigation.

The site is occupied by agricultural land that is currently utilized to grow soy beans.

Available historical aerial photographs from 1939 through 2015 depict the majority of this site as agricultural land. From sometime before 1939 until sometime before 2015, a residential property with several outbuildings is present on the eastern portion of the site. All the buildings were razed between 2012 and 2015.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Due to the absence of any buildings, neither ACM nor LPB are likely to be present at the site.

No RECs were identified at the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of herbicides and pesticides based on current and historic use as agricultural land.

4.1.82 Site 82 Residential Property

Residential properties, 560 and 606 Wolf's Crossing Road, Oswego. The site is currently occupied by two (2) single-family residential properties. The western property, 606 Wolf's Crossing Road, is a one-story ranch style single family home, with an asphalt driveway and associated landscaped areas. The building appears to be of wood and brick construction. Based upon aerial photographs, a barn is present behind the house to the south. The eastern property, 560 Wolf's Crossing Road, is occupied by a two-story single family home, with a gravel driveway, a detached garage, three (3) barns, a grain silo, and associated landscaped areas. The house and barns appear to be of wood construction, the garage of brick construction, and the silo of metal construction.

Available historical aerial photographs from 1939 to sometime before 1973 depict the site as a residential property with several outbuildings at the present day location of 560 Wolf's Crossing Road. Sometime between 1956 and 1973 the building at 606 Wolf's Crossing Road was constructed.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the age of the homes, both ACM and LBP are potentially present at the site.

No RECs were identified for the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of ACM and LBP.

4.1.83 Site 83 Residential Property

Residential property, 500 Wolf's Crossing Road, Oswego. The site is a one-story single family home with an asphalt driveway and associated landscaped areas. The building appears to be of brick and wood construction. Based upon aerial photographs, a small shed is present south of the home. The shed appears to be of wood construction.

Available historical aerial photographs depict the site as agricultural land from 1939 until sometime before 1946 when the current structures were constructed at the site.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the age of the home, both ACM and LBP are potentially present at the site.

No RECs were identified for the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of ACM and LBP.

4.1.84 Site 84 Residential Property

Residential property, 460 Wolf's Crossing Road, Oswego. The site is currently occupied by a one-story single family home with a detached garage, an asphalt driveway and associated landscaped areas. Both the home and the garage appear to be of wood construction.

Available historical aerial photographs depict the site as agricultural land from 1939 to sometime before 1952. Sometime between 1952 and 1973, the current structures present at the site were built.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the age of the home, both ACM and LBP are potentially present at the site.

No RECs were identified for the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of ACM and LBP.

4.1.85 Site 85 Residential Property

Residential property, 340 Wolf's Crossing Road, Oswego. The site is a one-story single family home with an asphalt driveway and associated landscaped areas. Based upon aerial photographs, there are two (2) barns and a man-made pond on the south side of the site. The home appears to be of brick and wood construction.

Available historical aerial photographs depict the site as a residential property from sometime before 1939 until sometime before 1946. Sometime between 1946 and 1952, the buildings were razed. The site appears to be vacant from sometime before 1952 until sometime before 1978. The structures currently present at the site were built sometime between 1972 and 1978.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based on the date of construction of the building, sometime between 1972 and 1978, both ACM and LBP may be preset in the building at the site.

No RECs were identified for the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of ACM and LBP.

4.1.86 Site 86 HRC Granite and Flooring

HRC Granite, 60 Wolf's Crossing Road, Oswego. This site is currently utilized as a retail granite countertop and flooring store. The site is occupied by a warehouse style building with a gravel parking lot. An arrangement of concrete blocks in the southeast corner of the site is were formerly utilized to segregate landscaping materials, but is currently utilized for automobile parking.

Available historical aerial photographs from sometime 1939 until 1952 depict the site as undeveloped land. Sometime between 1952 and 1973, the current structure was built at the site and the east side of the site remained undeveloped. The gravel parking lot on the east side was expanded to its current size and shape sometime between 1999 and 2007.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or

dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the age of the home, both ACM and LBP are potentially present at the site.

No RECs were identified for the site.

The following *de minimis* conditions have been identified for this site:

- Potential presence of ACM and LBP.

4.1.87 Site 87 Wolf's Crossing Elementary School

Wolf's Crossing Elementary School, 3015 Heggs Road, Aurora. The site is currently occupied by an elementary school, with an asphalt parking lot, athletic fields and associated landscaped areas. The parking lot, athletic fields and landscaped areas are shared with Bednarcik Junior High School, adjacent to the south. The building is a two-story brick and cinderblock school.

Available historical aerial photographs from 1939 to sometime before 1999 depict the site as agricultural land. Sometime between 1999 and 2007, the current buildings at the site were constructed.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the age of the building, neither ACM nor LBP are suspected to be present at the site.

No RECs or *de minimis* conditions have been identified for this site.

4.1.88 Site 88 Residential Property

Residential property, 10140 Heggs Road, Oswego. The site is currently occupied by a two-story single family residential property. The site is occupied by a two-story single family home, with a detached garage, a concrete driveway and associated landscaped areas. The home appears to be of brick and wood construction, and the garage appears to be of wood construction.

Available historical aerial photographs from 1939 to sometime before 1988 depict the site as agricultural land. Sometime between 1988 and 1998, the current buildings at the site were constructed.

The site does not appear in any regulatory database reviewed.

No visual evidence of spills, stressed vegetation, depressions, mounding or soil piles, lagoons or surface impoundments, stained soil or pavement, water discoloration, fill, storage tanks (above or underground), pumps or dispensers, protruding pipes, pipelines, drums, monitoring wells, pits, solid waste, transformers, non-petroleum chemical use or storage, or unusual or noxious odors were noted at the site during the September 1, 2017 site visit. Based upon the age of the building, neither ACM nor LBP are suspected to be present at the site.

No RECs or *de minimis* conditions have been identified for this site.

4.2 Other Potential Man-Made Hazards

GSG conducted a search of federal, state, and other environmental databases for sites with reported environmental concerns on sites adjoining (but not along) the proposed project. For certain resources (NPL, CERCLIS), the search distances were expanded in the judgment of the environmental professional. Based on this expanded search, no NPL Sites (Active, Proposed and Archived) or CERCLIS sites are located within a 1-mile radius of the project. There is one (1) site that is adjacent to adjoining properties that are listed on various databases.

4.2.1 Site A Walgreens #5824

Walgreens Store #5824, 410 Chicago Road, Oswego. The site is a retail pharmacy that is located across US-34/Route 71 from site 2. The site is a one-story commercial building with associated asphalt parking lot and landscaped areas. The building appears to be of brick and cinder block construction.

Available historical aerial photographs from 1939 through 1973 depict the site as having US-34/Route 71 running through the southeast corner of the site and an access drive running north from the roadway to a property further north. The rest of the site is either undeveloped land or agricultural land. Sometime between 1973 and 1978, the US-34/Route 71 was moved so that it no longer crosses through the property. The site remained in this condition until sometime between 1999 and 2007 when the site was redeveloped into its current configuration.

The site is listed in the RCRA-CESQG, FINDS and ECHO databases. The site is listed in the RCRA-CESQG database as a generator of class D000 (undefined) and D011 (silver) waste. No violations were reported for the site.

No RECs were identified for this site.

The following *de minimis* conditions have been identified for this site:

- The site is a generator of class D000 (undefined) and D011 (silver) waste

4.2.2 Site B Amoco Oil Co. #9524

Amoco Oil Co. #9524, 411 Chicago Road, Oswego. The site is currently occupied by two (2) one-story brick buildings, perpendicular to each other, a large asphalt parking lot, and associated landscaped areas. The site was formerly a gas station. The northern building is a Subway restaurant. The building appears to be of brick and cinder block construction. The southern building is a self-service car wash. The building appears to be of brick and cinderblock construction. The site is across US-34/Route 71 from site 46.

Available historical aerial photographs from 1939 to 1952 depict the site as being agricultural land. Sometime between 1952 and 1973, the site is developed with a small building on the south side with a large parking lot north of it. Sometime between 1973 and 1978, a larger building is built where the smaller building was previously, and a small building has been built in the parking lot on the northern part of the site. Sometime between 1988 and 1999, the large building was razed and replaced by a two (2) smaller buildings, perpendicular to each other. Sometime between 1999 and 2007, the small building in the parking lot was razed, leaving the site in its current configuration.

The site is listed in the FINDS, ECHO, RCRA-SQG, LUST and UST databases. The site is listed in the UST database for having the following USTs at the site: two (2) 12,000-gallon gasoline tanks; one (1) 10,000-gallon gasoline tank; one (1) 8,000-gallon gasoline tank; two (2) 4,000-gallon gasoline tanks; and one (1) 500-gallon used oil tank. All of the USTs have been removed and the site is listed as "CLOSED."

The site is listed in the LUST database for IEMA #931874, reported on July 13, 1993, for an unknown release. A 20-Day Report was issued on July 16, 1993, a 45-Day Report was issued on August 27, 1993 and a No Further Remediation Letter was issued on November 13, 1997.

The site was listed in the RCRA-SQG database as a generator of class D001 (ignitable) wastes. No violations were found in relation to this property.

The following REC was identified for this site:

- The historic presence of a LUST incident related to the site's former use as a gasoline station.

The following *de minimis* conditions have been identified for this site:

- Historic presence of seven (7) USTs and the use of the site as a gasoline station.
- The site was an historic generator of ignitable wastes. No violations were found in relation to this site.

4.2.3 *Site C Oswego Township Highway Department*

Oswego Township Highway Department, 4100 Route 71, Oswego. The site is currently a vacant two-story brick office building with an asphalt parking lot, a detached garage on the east side of the site. The site was formerly utilized by the Oswego Township Highway Department. The site adjoins site 47.

Available historical aerial photographs from 1939 until 1952 depict the site as being agricultural property. Sometime between 1952 and 1973, the current buildings present at the site were constructed.

The site is listed in the UST database. The site is listed in the UST database for having the following USTs at the site: one (1) 2,000-gallon diesel fuel UST and one (1) 500-gallon gasoline UST. The USTs were removed from the site and the facility is closed.

No RECs were identified for this site.

The following *de minimis* conditions have been identified for this site:

- Historic presence of one (1) 2,000-gallon diesel fuel UST and one (1) 500-gallon gasoline UST.

4.2.4 *Site D KR&G Excavating Partners*

KR&G Excavating Partners, 7 Stone Hill Drive, Oswego. The site is currently an office building utilized by a construction company. The site has a parking lot and storage area for construction equipment. The site adjoins site 47.

Available historical aerial photographs from 1939 to 1978 depict the site as being agricultural property. Sometime between 1978 and 1984, the current building at the site was constructed.

The site is listed in the RCRA-SQG and UST databases. The site is listed in the RCRA-SQG database as a generator of class D001 (ignitable) waste. No violations were reported for this site. The site is listed in the UST database for the following USTs: two (2) 3,000-gallon diesel fuel UST; one (1) 2,000-gallon gasoline UST; and one (1) 3,000-gallon gasoline UST. These USTs have been removed and the facility is listed as closed.

No RECs were identified for this site.

The following *de minimis* conditions have been identified for this site:

- Site is a generator of class D001 (ignitable) wastes.
- Historic presence of two (2) 3,000-gallon diesel USTs, one (1) 2,000-gallon gasoline UST and one (1) 3,000-gallon gasoline UST.

- The potential presence of ACMs and LBP, based upon the age of the building.

4.2.5 Site E Liqui Trol Systems, Inc.

Liqui Trol Systems, Inc., 6 Stone Hill Drive, Oswego. The site is a metal and brick warehouse style building, with an asphalt parking lot and associated landscaped areas. The site adjoins sites 48 and 49.

Available historical aerial photographs from 1939 to 1952 depict the site as being agricultural land. Sometime after 1952 until sometime before 1984, the site utilized as a construction staging area. Sometime between 1973 and 1984 the site is vacant. Sometime between 1984 and 1988, the current building present at the site was constructed.

The site is listed in the RCRA-SQG, FINDS, and ECHO databases. The site is listed in the RCRA-SQG database as a generator of class D001 (ignitable), F001 (spent halogenated solvents), F003 (spent nonhalogenated solvents), and F005 (spent nonhalogenated solvents). No violations were reported for the site.

No RECs were identified for this site.

The following *de minimis* conditions have been identified for this site:

- The site is a generator of class D001 (ignitable), F001 (spent halogenated solvents), F003 (spent nonhalogenated solvents), and F005 (spent nonhalogenated solvents).

4.3 Natural Hazards

4.3.1 Wetlands

The U.S. Fish and Wildlife Service National Wetlands Inventory Map (<https://mrdata.usgs.gov/general/map-us.html>) indicated the presence of wetlands within the project area. Wetlands are located on the following sites: 1, 6, 10, 13, 36, 45 and 52.

The wetlands on Sites 10, 13, 36, 45 and 58 are listed as PUBGx, man-made freshwater ponds. A PUBGx wetland is translated as the following:

PUBGx

P: System **PALUSTRINE:** The Palustrine System includes all nontidal wetlands dominated by trees, shrubs, emergents, mosses or lichens, and all such wetlands that occur in tidal areas where salinity due to ocean derived salts is below 0.5 ppt. Wetlands lacking such vegetation are also included if they exhibit all of the following characteristics: 1. are less than 8 hectares (20 acres); 2. do not have an active wave-formed or bedrock shoreline feature; 3. have at low water a depth less than 2 meters (6.6 feet) in the deepest part of the basin; 4. have a salinity due to ocean-derived salts of less than 0.5

ppt.

UB: Class UNCONSOLIDATED BOTTOM: Includes all wetlands and deepwater habitats with at least 25% cover of particles smaller than stones (less than 6-7 cm), and a vegetative cover less than 30%.

G: WATER REGIME Intermittently Exposed: Surface water is present throughout the year except in years of extreme drought.

x: SPECIAL MODIFIER Excavated: Lies within a basin or channel that have been dug, gouged, blasted or suctioned through artificial means by man.

The wetlands on Sites 6 and 13 are listed as PFO1C, Freshwater Forested/Shrub Wetland. A PFO1C wetland is translated as the following:

PFO1C

P: System PALUSTRINE: The Palustrine System includes all nontidal wetlands dominated by trees, shrubs, emergents, mosses or lichens, and all such wetlands that occur in tidal areas where salinity due to ocean derived salts is below 0.5 ppt. Wetlands lacking such vegetation are also included if they exhibit all of the following characteristics: 1. are less than 8 hectares (20 acres); 2. do not have an active wave-formed or bedrock shoreline feature; 3. have at low water a depth less than 2 meters (6.6 feet) in the deepest part of the basin; 4. have a salinity due to ocean-derived salts of less than 0.5 ppt.

FO: Class FORESTED: Characterized by woody vegetation that is 6 m tall or taller.

1: Subclass Broad-Leaved Deciduous: Woody angiosperms (trees or shrubs) with relatively wide, flat leaves that are shed during the cold or dry season; e.g., black ash (*Fraxinus nigra*).

C: WATER REGIME Seasonally Flooded: Surface water is present for extended periods especially early in the growing season, but is absent by the end of the growing season in most years. The water table after flooding ceases is variable, extending from saturated to the surface to a water table well below the ground surface.

The wetlands on Sites 13 is listed as **PEM1/SS1C**, Freshwater Emergent Wetland. A **PEM1/SS1C** wetland is translated as the following:

PEM1/SS1C

P: System PALUSTRINE: The Palustrine System includes all nontidal wetlands dominated by trees, shrubs, emergents, mosses or lichens, and all such wetlands that occur in tidal areas where salinity due to ocean derived salts is below 0.5 ppt. Wetlands lacking such vegetation are also included if they exhibit all of the following characteristics: 1. are less than 8 hectares (20 acres); 2. do not have an active wave-formed or bedrock shoreline feature; 3. have at low water a depth less than 2 meters (6.6 feet) in the deepest part of the basin; 4. have a salinity due to ocean-derived salts of less than 0.5 ppt.

EM: Class **EMERGENT:** Characterized by erect, rooted, herbaceous hydrophytes, excluding mosses and lichens. This vegetation is present for most of the growing season in most years. These wetlands are usually dominated by perennial plants.

1: Subclass **Persistent:** Dominated by species that normally remain standing at least until the beginning of the next growing season. This subclass is found only in the Estuarine and Palustrine systems.

P: System **PALUSTRINE:** The Palustrine System includes all nontidal wetlands dominated by trees, shrubs, emergents, mosses or lichens, and all such wetlands that occur in tidal areas where salinity due to ocean derived salts is below 0.5 ppt. Wetlands lacking such vegetation are also included if they exhibit all of the following characteristics: 1. are less than 8 hectares (20 acres); 2. do not have an active wave-formed or bedrock shoreline feature; 3. have at low water a depth less than 2 meters (6.6 feet) in the deepest part of the basin; 4. have a salinity due to ocean-derived salts of less than 0.5 ppt.

SS: Class **SCRUB-SHRUB:** Includes areas dominated by woody vegetation less than 6 m (20 feet) tall. The species include true shrubs, young trees (saplings), and trees or shrubs that are small or stunted because of environmental conditions.

1: Subclass **Broad-Leaved Deciduous:** Woody angiosperms (trees or shrubs) with relatively wide, flat leaves that are shed during the cold or dry season; e.g., black ash (*Fraxinus nigra*).

C: WATER REGIME **Seasonally Flooded:** Surface water is present for extended periods especially early in the growing season, but is absent by the end of the growing season in most years. The water table after flooding ceases is variable, extending from saturated to the surface to a water table well below the ground surface.

The wetlands that cross Site 1 is listed as R2UBH, Riverine. A R2UBH wetland is translated as the following:

R2UBH :

R: System **RIVERINE:** The Riverine System includes all wetlands and deepwater habitats contained in natural or artificial channels periodically or continuously containing flowing water or which forms a connecting link between the two bodies of standing water. Upland islands or Palustrine wetlands may occur in the channel, but they are not part of the Riverine System.

2: Subsystem **LOWER PERENNIAL:** This Subsystem is characterized by a low gradient and slow water velocity. There is no tidal influence, and some water flows throughout the year. The substrate consists mainly of sand and mud. The floodplain is well developed. Oxygen deficits may sometimes occur.

UB: Class **UNCONSOLIDATED BOTTOM:** Includes all wetlands and deepwater habitats with at least

25% cover of particles smaller than stones (less than 6-7 cm), and a vegetative cover less than 30%.

H: WATER REGIME Permanently Flooded: Water covers the land surface throughout the year in all years.

4.3.2 Floodplains

According to the EDR Database search, The Federal Emergency Management Agency indicates the presence of a 100-year floodplain within the project area and on several adjoining properties. Based upon FEMA maps, the 100-year floodplain can be found on sites 1, 12, 13 and 51

The Overview Map of the Environmental Data Resources Report, included in **Appendix E**, shows the project area in relation to the 100-year flood zone. FEMA maps typically do not reflect potential local drainage problems or the ability of the local storm water management system to convey the surface water runoff created by storms or other occurrences.

4.3.3 Landslides

GSG reviewed the Illinois State Geological Survey website (www.isgs.illinois.edu) to identify if any landslide data could be identified and no information was found. Topographic and aerial maps were searched between the years 1923 to 2015 received from EDR database search. None of the maps displayed any landslide information for the project area.

4.3.4 Mine Subsidence

As shown on the ISGS Coal Mines in Illinois Viewer (<http://isgs.illinois.edu/ilmines>), the closest active mine is located approximately 7.3 miles north of the project area. As shown on the USGS Mineral Resource Data System (MRDS) (<https://mrdata.usgs.gov/mrds/map-us.html>) the Hafrenrichter Gravel Pit, formerly a sand and gravel mine, was located approximately 1 mile north of the project area. However, based upon aerial photographs, that area was redeveloped as residential properties sometime between 1988 and 1999. Therefore, it is our opinion that mining is not a concern.

4.3.5 Seismicity

GSG reviewed several ISGS publications in an effort to describe the regional geological setting in the project area, inclusive of the survey limits at the individual crossings. Site-specific geologic seismic information was not identified during the course of this assessment. Of note, the Sandwich Fault Zone is located approximately 15 miles southwest of the project area.

The 2014 U.S. Geological Survey (USGS) National Seismic Hazard Maps display earthquake ground motions for various probability levels across the United States and are applied in seismic provisions

of building codes, insurance rate structures, risk assessments, and other public policy (<http://earthquake.usgs.gov/hazards/products>).

The 2014 U.S. Geological Survey National Seismic Hazard Maps present probabilistic ground motion for Peak Ground Acceleration (PGA), 1Hz (1.0 second SA), and 5Hz (0.2 second SA) (<https://earthquake.usgs.gov/hazards/hazmaps/conterminous>). According to 2014 U.S Geological Survey National Seismic Hazard Maps for the project area, on the 1 second Spectral Acceleration (SA) with 10 % probability of exceedance in 50 years map the project area is rated as 0.02 to 0.03 (on the scale from 0 to >0.4), on the 2 second Spectral Acceleration (SA) with 10 % probability of exceedance in 50 years map the project area is rated as 0.04 to 0.06 (on the scale from 0 to >0.8) and on the Peak Ground Acceleration (PGA) with 2% probability of exceedance in 50 years map the project area is rated as 0.06-0.1 (on the scale from 0 to >0.8).

6.0 CONCLUSIONS

1. RECs were identified at the following sites along the project:
 - Site 2 Speedway #1417: Existing gas station, historic LUST, historic generator of solid waste
 - Site 13 Fox Bend Golf Course: Historic LUST
 - Site 19 Vacant Parcel: Unknown fill
 - Site 23 Vacant Parcel: Unknown fill
 - Site 62 Vacant Parcel: Unknown fill
 - Site 65 Residential Property: Unknown fill
 - Site 68 Residential Property: Unknown fill
 - Site 78 Residential Property and Agricultural Land: Unknown fill

2. *De minimis* conditions were identified at forty-four (44) sites along the project area.

3. No RECs or *de minimis* conditions were identified at thirty-six (36) sites along the project area.

4. Other properties that appear on environmental databases as listed in the text were identified on sites adjacent to the proposed project:
 - Walgreen's #5824, 410 Chicago Road – RCRA-CESQG, FINDS, ECHO
 - Amoco Oil #9524, 411 Chicago Road – FINDS, ECHO, RCRA-SQG, LUST, UST
 - Oswego Township Highway Department, 4100 Route 71 - UST
 - KR&G Excavating Partners, 7 Stone Hill Drive – RCRA-SQG, UST
 - Liqui Trol Systems, Inc., 6 Stone Hill Drive – RCRA-SQG, FINDS, ECHO

5. For the purposes of this report, the following are considered to be *de minimis* conditions:
 - Normal use of lead-based paint (LBP) on exteriors and interiors of buildings and structures
 - Use of asbestos-containing materials (ACM) in building construction
 - The presence of ASTs and/or USTs with no reported releases
 - Transformers in normal use, unless the transformers were observed to be leaking, appear on an environmental regulatory list, or were otherwise determined to pose a hazard not related to normal use
 - Potential presence of pesticides and herbicides, based on current and/or historic usage of the site for agricultural purposes.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by GSG Environmental Group, LLC. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:**Coordinates:**

P.O.#	NA	Latitude:	41.692559 41° 41' 33" North
Project:	NA	Longitude:	-88.292892 -88° 17' 34" West
		UTM Zone:	Zone 16 North
		UTM X Meters:	392410.84
		UTM Y Meters:	4616449.79
		Elevation:	689.28' above sea level

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by GSG Environmental Group, LLC. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL RECORDS

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/12/2016 has revealed that there are 4 RCRA-SQG sites within the searched area.

<i>LIQUI TROL SYSTEMS I</i>	<i>6 STONEHILL DR</i>	<i>5</i>	<i>33</i>

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/12/2016 has revealed that there are 3 RCRA-CESQG sites within the searched area.

EXECUTIVE SUMMARY

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 04/04/2017 has revealed that there are 8 FINDS sites within the searched area.

EDR PROPRIETARY RECORDS

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within the searched area.

Environmental Interest/Information System

ACES (Illinois - Agency Compliance And Enforcement System) is the Illinois EPA Project to facilitate the permitting operations

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/05/2017	Source: EPA
Date Data Arrived at EDR: 04/21/2017	Telephone: N/A
Date Made Active in Reports: 05/12/2017	Last EDR Contact: 07/07/2017
Number of Days to Update: 21	Next Scheduled EDR Contact: 10/16/2017
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/05/2017	Source: EPA
Date Data Arrived at EDR: 04/21/2017	Telephone: N/A
Date Made Active in Reports: 05/12/2017	Last EDR Contact: 07/07/2017
Number of Days to Update: 21	Next Scheduled EDR Contact: 10/16/2017
	Data Release Frequency: Quarterly

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/05/2017	Source: EPA

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

LIENS 2: CERCLA Lien Information

A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

	Data Release Frequency: Quarterly

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: 312-886-6186

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: 312-886-6186

	Data Release Frequency: Quarterly

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: 312-886-6186

Number of Days to Update: 44	Next Scheduled EDR Contact: 10/09/2017
	Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: 312-886-6186
Date Made Active in Reports: 02/10/2017	Last EDR Contact: 08/11/2017
Number of Days to Update: 44	Next Scheduled EDR Contact: 10/09/2017

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HWAR: Hazard Waste Annual Report

Each year, Illinois hazardous-waste generators tell the Illinois EPA the amounts and kinds of hazardous waste they produced during the previous year. Generators indicate by code the types of wastes produced and the steps they took to manage these wastes. If some or all of these wastes were sent to commercial treatment, storage, and disposal facilities (TSDFs), that information and the identity of each receiving facility also are submitted. Illinois TSDFs likewise report the types and quantities of wastes received from in-state and out-of-state generators; they also report the procedures they used to manage these wastes.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR PROPRIETARY RECORDS

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Homes & Centers Listing

Source: Department of Children & Family Services

Telephone: 312-814-4150

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
